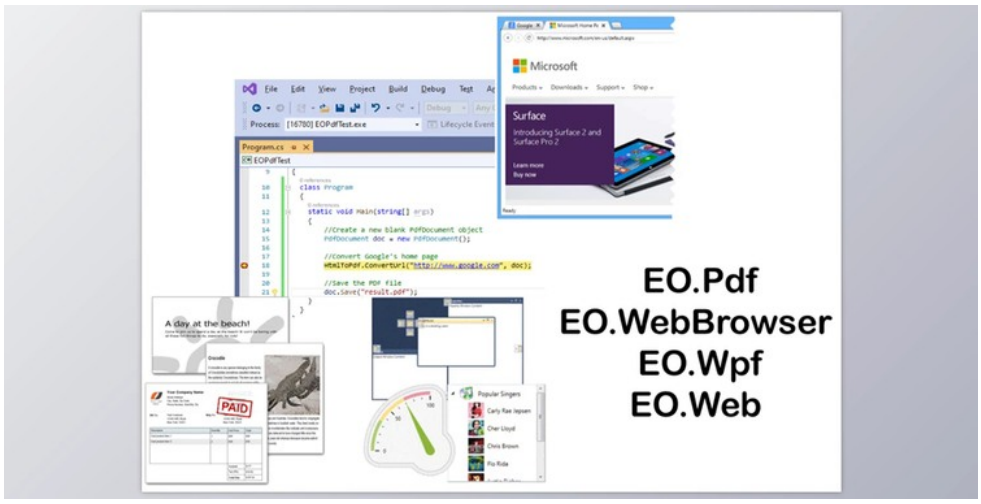
Essential Objects EO.Total v2025.0.50.0 (06 Jan 2025) Retail

2025-12-02 13:55:15



is a comprehensive suite of .NET tools comprising EO.Pdf, EO.WebBrowser, EO.Wpf, and EO.Web, is designed to elevate the functionality and user experience of your applications. With EO.Pdf, you can seamlessly generate, process, and view PDF files within your .NET applications, leveraging the Google Chromium browser engine for accurate rendering. Supporting various .NET frameworks, EO.Pdf simplifies tasks such as HTML to PDF conversion and working with existing PDF files.

EO.WebBrowser seamlessly integrates the power of the Chromium browser engine into .NET applications, offering both UI-based and headless browsing capabilities for tasks like data crawling and automation. With extensive customization options for UI, resource loading, and JavaScript interfaces, EO.WebBrowser enables flexible integration without external dependencies. EO.Wpf complements standard WPF controls, offering a rich set of UI components with built-in skin and theme engines, enhanced controls, and support for various .NET frameworks.

For legacy ASP.NET WebForm applications, EO.Web provides high-quality UI controls, ensuring compatibility and reliability over time. While not suitable for newer ASP.NET frameworks like MVC, EO.Web is perfect for maintaining and enhancing legacy codebases within larger applications. With continuous updates and support, **Essential Objects EO.Total** empowers developers to extend the capabilities of their .NET applications effortlessly, whether it's for PDF generation, web browsing integration, or UI enhancement in WPF or ASP.NET environments.

Key Features of **Essential Objects EO.Total**:

1. **EO.Pdf:**
    - HTML to PDF conversion based on the Google Chromium browser engine
    - Accurate rendering of content, including complex layouts and styles
    - Support for generating, processing, and viewing PDF files
    - Compatibility with various .NET frameworks, including .NET Framework 2.0 and above, .NET Core 3.0 and above
    - PDFViewer class for both WPF and Windows.Forms applications
    - Ability to read, fill, and sign existing PDF files
    - No installation required, 100% managed DLLs
2. **EO.Wpf:**

所有软件资源 100%安全 已检测 无病毒 无篡改

标签

.Net ASP.Net Components

- Enhanced UI control library for WPF applications
- Built-in skin and theme engine for customization
- Enhanced versions of standard controls such as TabControl and ListBox
- Visual Studio-style docking view engine for improved user experience
- Various scales and gauge controls/primitives for data visualization
- Compatibility with .NET Framework 4.0 and above, .NET Core 3.1 and above

3. **EO.Web:**
   - High-quality UI controls for legacy ASP.NET WebForm applications
   - Fully tested and compatible with ASP.NET WebForm environments
   - Support for maintaining and enhancing legacy codebases within larger MVC applications
   - Regular updates and support for platform and browser compatibility
   - Compatibility with .NET Framework 2.0 and above, .NET Core 3.0 and above
4. **EO.WebBrowse:**
   - Integration of the Chromium browser engine into .NET applications
   - Support for both UI-based and headless browsing modes
   - Extensive customization options for UI, resource loading, and JavaScript interfaces
   - Seamless integration into Windows.Forms and WPF applications
   - Compatibility with various .NET frameworks, including .NET Framework 2.0 and above, .NET Core 3.0 and above
   - Fully self-contained with no external dependencies
