What is Soundbox Platinum FX (WAV)?

Sound effects, often referred to as "FX," are audio clips that are used to enhance various types of media, including music production, film, TV shows, animations, video games, and more. These effects can range from ambient sounds to specific noises like explosions, footsteps, transitions, and more. WAV is a common audio file format known for its high audio quality and compatibility with various digital audio workstations (DAWs) and media software.
