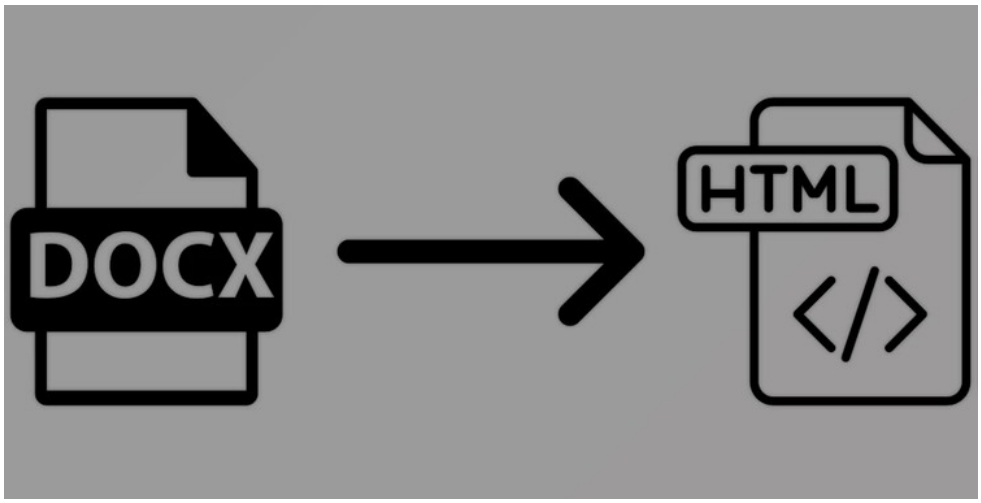
SubSystems DOCX to HTML Converter v14.0 for .Net

2025-06-08 16:14:36



DOCX into HTML Converter delivers a very simple and hassle-free way of switching from DOCX into HTML format inside your program. You may make only 1 function call to perform the conversion.

No additional external elements or programs will be needed if you use this specific converter. The converter comprises a strong DOCX parser used by our TE Edit Control merchandise. Besides, it comes with a strong HTML parser used by our HTML Add-on merchandise. This converter combines the performance of TE Edit Control and HTML Add-on to offer you a cost-efficient, feature-rich, and powerful translator.

DOCX into HTML Conversion supports the following attributes:

- Conversion from DOCX into HTML format.
- Fonts, point-size, various personality designs, and colors.
- Paragraph formatting attributes like centering, justification, indentation, etc...
- Support for PNG, JPEG, WMF, EMF, and WMF picture formats.
- Embedded and related images. The embedded images in the RTF documents are automatically stored to disc using a connection in the created HTML file.
- Headers/footers.
- Table and nested tables.
- Unicode support.
- Right-to-left and combine text assistance.
- Support for vertical text.

Code Output: The created HTML code could be written to a disc or it may be recovered in a memory buffer.

Programming Interface: Your program only uses function calls to perform the conversion. The Win32 and Win64 models contain the purpose and constant declaration documents for C/C++, Visual Basic, and Delphi. The item is usable in almost any environment that allows for phoning easy DLL functions.

The .NET edition of the item consists of pure C# managed code. The .NET version may also be used in an ASP.NET server program.
