devmate Automated Software Testing v1.1.1 (09 Sep 2020)

2026-10-06 05:58:29

DevMate helps programmers to concentrate on their imagination by automating unit tests.

Instantly and automatically produce test cases for complete operational code protection. Create a wholly automated test code in test instances in the touch of a button. Acceleration of test case production up to 50 percent through automatic evaluation data conclusion!

State of the art evaluation methods

100% service using ISTQB and ISO criteria.
Equivalence class analysis.
Limit value evaluation.

Languages support

Devmate who supports popular programming languages such as C#. Java is coming shortly.

Generation of evaluation versions from code

Devmate automatically parses the developed code and makes a new evaluation version with just two clicks.

Seamless integration in Visual Studio 2019

No tool change is required. Devmate opens inside the context menu in the IDE at the shape of a tab, which may be randomly moved and placed.
