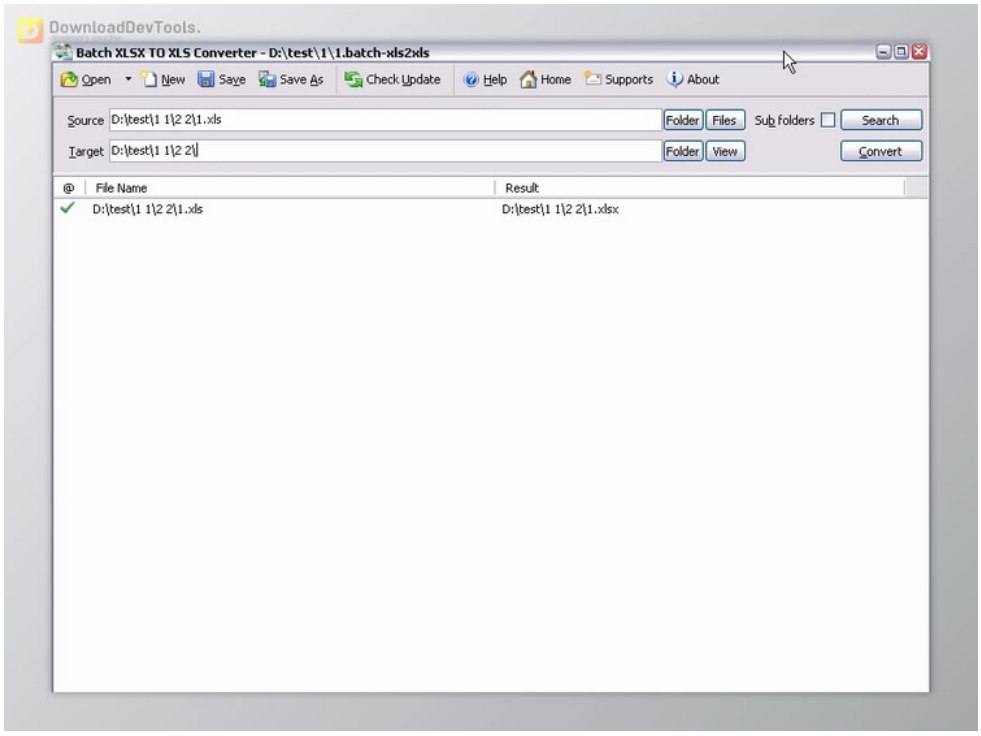
Batch XLS and XLSX Converter v2025.17.916.2695

2025-11-04 21:16:07



is a simple yet powerful tool for converting Excel files between the older XLS format (Excel 2003) and the newer XLSX format (Excel 2007 and later). Whether you need to convert a single file or an entire folder of files, this converter makes the task quick and easy with its user-friendly interface. It also supports drag-and-drop functionality, so you can easily add files, and it integrates into the right-click menu in Windows Explorer for even more convenience.

The software's efficient multi-threaded engine ensures fast and smooth conversions, allowing you to pause, stop, or resume the process whenever needed. You can also save your conversion tasks as reusable project files, which can be run directly from Windows Explorer or through the command line, giving you flexibility in your work.

Batch XLS and XLSX Converter is designed to handle large numbers of files efficiently, making them ideal for businesses or anyone who frequently needs to switch between Excel file formats. Their easy setup and strong performance make them a must-have tool for anyone working with Excel spreadsheets across different versions.

Key Features of **Batch XLS and XLSX Converter** :

1. XLS to XLSX and vice versa: Easily convert Excel 2003 files (XLS) to the 2007 format (XLSX) and back.
2. Batch conversion: Convert multiple files or whole folders simultaneously, saving time.
3. User-friendly interface: The simple GUI supports drag-and-drop for quick file addition.
4. Explorer context menu: Right-click integration in Windows Explorer for faster file selection.
5. Multi-threaded conversion engine: Allows efficient processing with the option to pause, stop, and resume conversions.
6. Project file support: Save conversion tasks for later use and execute them from the command line or Explorer.
7. System compatibility: Works with all major Windows versions, including XP, Vista, 7, 8, and Windows Server editions.
