Winsoft AI Runtime v1.9 for Delphi XE2-13 Florence Full Source

2026-08-14 11:02:46

Winsoft AI Runtime is a library for Delphi & C++Builder developers to integrate Generative AI and LLM capabilities into their desktop applications. It enables locally executing supported AI models and is ideal for features like text generation, content analysis, intelligent assistance, and automated processing.

Winsoft AI Runtime provides the library with a fast and efficient way to execute models on 64-bit Windows machines. It is compatible with a large selection of development environments and provides source code with the registered version, along with the ability to distribute it royalty-free in commercial applications.

Key Features of **Winsoft AI Runtime** :

1. **Generative AI Integration:** Add AI-powered capabilities and Large Language Models directly to Delphi, C++Builder, and Lazarus applications.
2. **Microsoft ONNX Runtime Support:** Uses Microsoft's optimized runtime to execute compatible AI models efficiently.
3. **Local AI Model Execution:** Run supported models directly on the user's computer without relying entirely on external cloud services.
4. **64-bit Windows Support:** Designed for building and running AI-enabled applications on modern 64-bit Windows systems.
5. **Broad IDE Compatibility:** Compatible with Delphi and C++Builder XE2 through version 13, as well as Lazarus 4.8.
6. **Source Code Included:** The registered version includes source code, giving developers greater control over integration and customization.
7. **Royalty-Free Distribution:** Applications built with the library can be distributed commercially without paying additional runtime royalties.
