Euler Counter & Bar Stool: The two stools provide a place to sip your morning cup of coffee at the kitchen's island or enjoy drinks in your bar downstairs. It has a stylish bucket seat supported by a sturdy steel base with gold accents in champagne for an edgy look. There are footrests on both sides for comfort. The seat is covered in a beige-hued linen-blend fabric and is filled with foam for additional cushioning while you sit—a curved and sloping armrest, and a high back, complete the unique look.

How to design a chair in Photoshop?

You can use "Euler Counter & Bar Stool".
