Another preset pack, right? No.

There's no doubt that nearly every preset package you've purchased doesn't create a beautiful image and needs a lot of editing after applying the preset, or they alter your photos until the point that you have teal and orange, and there's nothing else. These presets can be edited with ease to give your photos a cool, summery look in just a single click.

CINEMATIC LOOK EASY

Do not stress about editing

Lightroom can be an intimidating place for a lot of people, particularly those who want to capture those cinematic-looking teals as well as oranges and desaturated greens but aren't sure what to do.

These presets will allow your pictures to appear as if they were taken by your top Instagram creators, without the hassle of balancing the angle for over 20 mins, or returning to the same slider after fourteen times.
