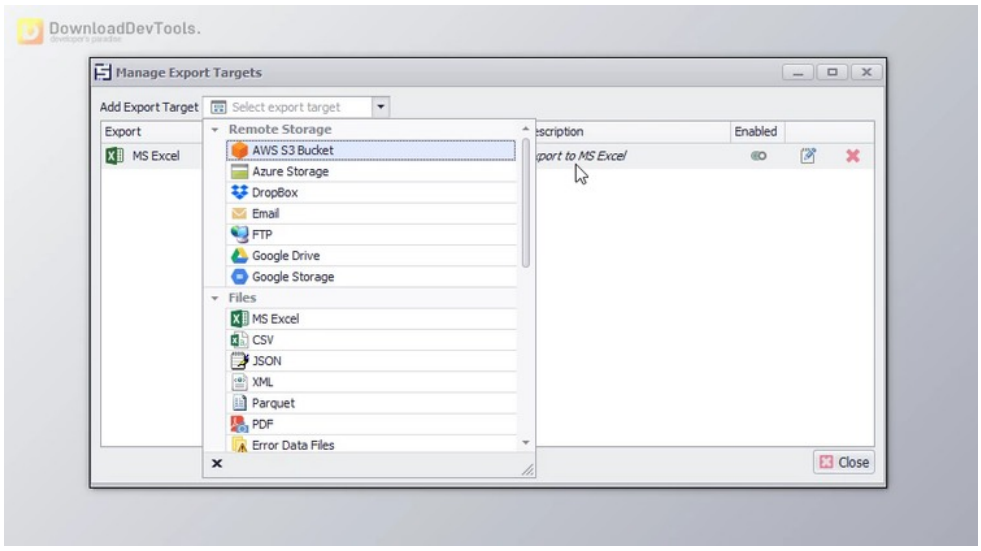
Sequentum Enterprise v2.82.0 for Win x64

2025-08-01 14:43:52



makes it easy for businesses to collect and organize large amounts of data from websites, databases, APIs, and files. Thanks to a user-friendly interface, any individual can easily create intelligent data agents and automate data functions. A platform like this allows companies to move from creating tools to learning from their data.

Sequentum integrates automation, error detection, data anonymization, and intelligent scheduling to manage work with dynamic websites, track updates, and ensure high-quality data. It allows users to connect custom scripts and well-known coding languages (including Python and JavaScript) as well as many AI, machine learning, and natural language processing libraries when needed.

Reliability, scalability, and compliance are all major priorities within **Sequentum Enterprise**. Businesses can deploy it locally, from the cloud, or with a mix of both. You also benefit from detailed trackable logs, the ability to control versions, set access rights, and manage all your servers and proxies together. No matter how many agents you use, Sequentum allows you to handle the setup and secure delivery routine.

Key Features of **Sequentum Enterprise** :

1. **Easy Setup & Use:** Get started quickly with a desktop install and connect to the server. Build agents without code using a visual editor.
2. **Flexible Data Collection:** Collect data from websites, files, APIs, or databases. Supports dynamic content, infinite scroll, and deduplication.
3. **Automation & Scheduling:** Schedule data jobs down to the second. Automate tasks with built-in routines and monitor progress in real time.
4. **Anonymization & Security:** Protect your operations with IP rotation, fingerprinting, and random cookie/header settings.
5. **Powerful Integration:** Export data in any format and send it anywhere. Use Python, JavaScript, or C# to customize agents.
6. **Enterprise-Grade Governance:** Maintain version control, permissions, audit trails, and centralized management of servers and proxies.

所有软件资源 100%安全 已检测 无病毒 无篡改
