Deepy Moody Teal Lightroom preset: Deepy Moody Teal can be described as a color that is perfect for skies, streets, landscapes, as well as nature and buildings. Incredible cinematic mood, with the deep teal hue and emphasizing only the most important, light elements of the scene and giving it an amazing and unique look.

The set is extremely simple to use, however, you must have basic knowledge of editing or experience using Lightroom presets, as they alter the tones quite some.

- 1 moody preset
- .xmp preset file
- designed specifically for Lightroom that syncs with the mobile Lightroom App
- Guide to installing presets PDF
- test on real-life photographs
- Tested on images of iOS as well as Android devices
- Compatible that works with .jpg as well as .raw images

INSTALLATION

1. Open Lightroom and open a photograph that you want to edit.
2. Look for the option "File" in the left of the top menu bar and click "Import Profiles and Presets ..." and select Deepy Moody Teal Preset.
3. In the right corner of the bottom corner, below the panel that has a general correction, you will find an option "Presets" and then choose the Moody Teal preset. This is it! Take pleasure in the wonder. Pay attention to the skin color when it's too red, you need to play with the warm color sliders by the luminance and saturation turned down. Additionally, you can set the sliders of light to create a more cinematic look.
