is a powerful tool that simplifies converting PowerPoint files (PPT and PPTX) into PDF format. Whether you're dealing with one file or many, this software allows you to easily convert them all in a batch, saving you time and effort. Its intuitive interface ensures that even beginners can use it without difficulty, and it supports drag-and-drop functionality and integration with Windows Explorer's right-click menu for quick access.

One of the standout features of **Batch PPT to PDF Converter** is its high-speed, multi-threaded engine, which ensures the conversion process is fast and efficient, even when dealing with large batches of files. You have full control over the process and can pause, stop, and resume the conversion as needed. Additionally, you can save your conversion settings in a project file, which can be reused later, either directly from the software or via the command line.

Batch PPT to PDF Converter is also highly versatile, supporting project-based operations, command-line functions, and the ability to search for files quickly within its GUI. It works seamlessly on various Windows operating systems, from XP to newer versions, and is compatible with Microsoft Office versions from 2000 to 2013.

Key Features of Batch PPT to PDF Converter :

1. Easy Conversion: Quickly convert PowerPoint PPT/PPTX files to PDF in bulk with a simple, user-friendly interface.
2. Batch Processing: This feature converts multiple files at once or entire folders of files, saving time with its powerful search function.
3. Drag-and-Drop & Context Menu: This menu supports drag-and-drop for quick file selection and is integrated with Windows Explorer for easy access via right-click.
4. Multi-Threaded Conversion: A High-speed engine ensures fast, efficient conversions, even for large file batches.
