FishCodeLib Convert .NET Professional v9.8.7708 (07 Feb 2021) Retail

2025-03-12 06:57:03

Convert .NET mobile text processing and conversion toolkit, aimed at programmers and helpful for many others.

Merge .NET is an incorporated, multi-purpose conversion and programmer tool 6-in-1. It includes attributes like Google+Yahoo+Bing+Excite+Yandex 5-in-1 translator, C# into VB, along with vice-versa Working with the ICSharpCode motor, Regular Expression tester, XML and JSON Browser, Base64 Encoding or Decoding and Encryption or Decryption.

A translation module functions as a casing for several translation engines (Google, Bing, Yandex, Excite), also supports 94 languages. It is ready to check text in a text box (something you have clicked or copied from the clipboard), in a URL, in one or more local or remote documents.

There is a full-strength C# <> VB.NET converter and support for converting anything out of a glued chunk of code into multiple documents.

An Encrypt/ Decrypt module permits you to generate encoded text messages utilizing AES, Rijndael, DES, TripleDES, or SHA.

An Encoding/ Decoding module transforms text and documents between different encoding schemes (Base64/ HTML/ URL/ / URL-js/ ESCAPE-js).

There is also a LINQ tester, a regular expression tester, and - just in case you wanted a single - an HTML/ JSON/ XML browser thrown in also.

FishCodeLib Convert .NET Professional Great Features:

- Multi-Language Translation
  - Multiple Translation Engines(Google/Bing/Baidu/Excite)
