

DevExpress .Net Core Desktop Components v20.2.7

2025-02-13 10:51:32

.NET Core version 3.0 introduced a lot of enhancements, the largest of these is service for desktop engineering - WinForms and WPF. Our products today support model 3.1, and we'll continue to maintain them compatible with the most recent framework upgrades.

Produce user adventures that are best-of-breed and emulate the UI of the hottest business productivity programs with DevExpress components for WinForms, WPF, ASP.NET Core, and Blazor.

Our whole product lines for your next platforms are now able to be utilized on your next .NET Core 3.1 program.

- WinForms Controls (CTP)
- WPF Controls
- ASP.NET Core Controls
- Blazor Controls

Controls are tagged CTP due to the limits that were design-time that was residual.

Deliver business program decision-support programs, and dashboards across devices and platforms using our package of panels and information and UI frameworks, reporting tools.

- Royalty-Free Reporting (Internet RTM, Desktop CTP)
- Royalty-Free Dashboard
- Office File API
- XAF - Program Framework (CTP)
- XPO - ORM Library

Products are tagged CTP due to the residual constraints that were design-time.

- **WinForms:** With 180+ parts and UI libraries, it's everything you will want to create high-impact small business options for your Windows Forms platform.
- **WPF:** With more than 120 UI tools and controls, the DevExpress WPF UI Library can help you produce a high-performance field of business programs that meet and exceed the requirements of your business enterprise.
- **Desktop Reporting:** DevExpress Reports is our semi-automatic reporting instrument and part library to the. NET Framework. Reports ship using runtime report artists such as WinForms/WPF/Web, an intuitive Visual Studio report designer, along with a set such as graphs and tabs in order, and your customers can produce reports of opinions and sophistication.
- **XAF - Program Framework:** once the opportunity to market things and you want to provide functional and easy-to-use small business solutions that aim both WinForms and ASP.NET, look no farther than the award-winning eXpressApp Framework™ (XAF).
- **XPO - ORM Library:** Persistent eXpress Objects (XPO) is an Object-Relational Mapping (ORM) tool that manages all aspects of database development and items persistence, letting you focus on your application's business logic instead of database issues. It provides Model First, Code First, and First growth workflows.
- **Dashboard:** make and distribute royalty-free decision support systems and easily discuss business intelligence (BI) throughout your whole enterprise. Incorporate panels to WinForms, WPF, Internet Forms, ASP.NET Core, and HTML JavaScript software utilizing our flexible Dashboard Designer and Viewer stage.
- **Office File API:** Utilize the DevExpress Office File API to read/write, alter, and publish XLS, PDF, DOC, and RTF documents. Merge files from 1 format into another. Password-protect data required and create compressed document archives and barcodes.
