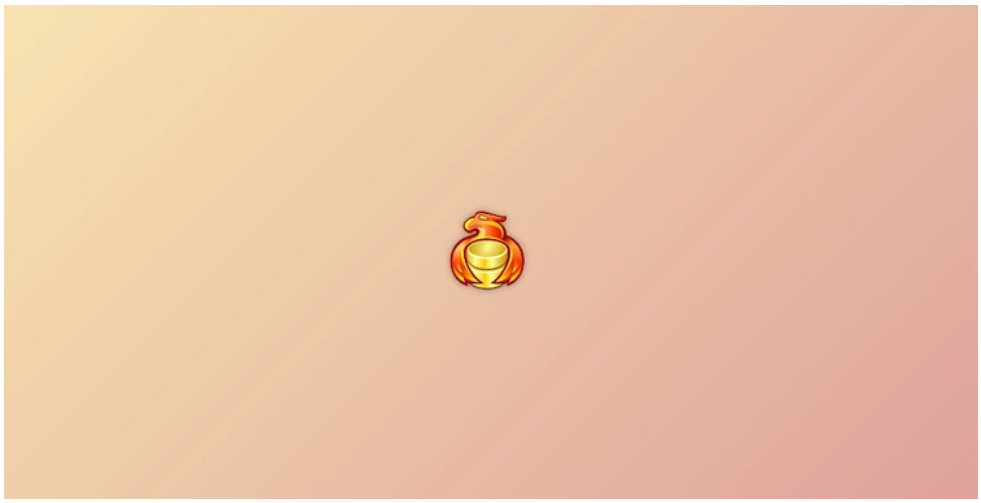
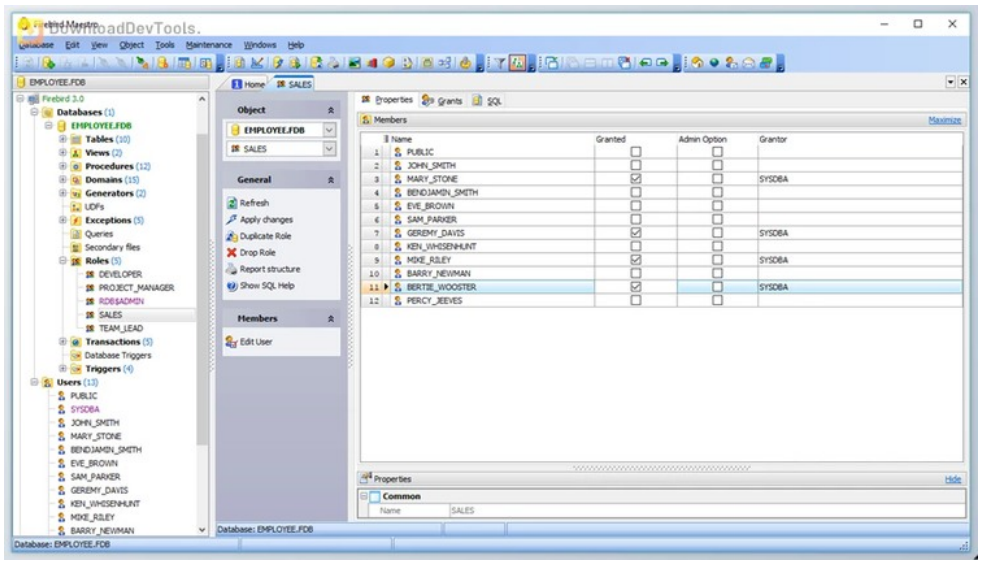
# SQL Maestro Firebird Maestro Professional v24.2.0.2 Multilingual

2025-01-29 13:26:17





is the premier Firebird tool for database management, control, and development. Designed for database developers, DBAs, and data analysts, it offers a rich set of GUI tools. Key features include support for all Firebird versions up to 5.0, easy database object management, a Database Designer, and comfortable access to Firebird security features.

Additionally, it provides data management and analysis tools, a Handy SQL Editor with code folding and multi-threading, and a Visual Query Builder with support for subqueries and UNIONS. Furthermore, it offers data export/import to/from popular formats, database schema refactoring tools, and a powerful BLOB Viewer/Editor.

These features make **SQL Maestro Firebird Maestro Professional** an irreplaceable assistant in the world of the Firebird database server. It boosts productivity and saves time and effort in managing and maintaining databases.
