Insofta Cover Commander v8.0 (01 Jul 2023) Multilingual

2025-07-17 16:53:02

As the online market has developed into a thriving market, it's an excellent idea to create attractive design concepts so buyers know exactly what they will buy. It's a good thing that these designs are easily created using specialized software such as Insofta Cover Commander.

The program starts with a splash screen that previews what you could accomplish and options to start an entirely new project, improve existing ones, or follow the wizard's steps to quickly and easily develop your project. The interface is easy to use and includes an ample interactive preview space, tabbed properties, and an object selection panel that allows easy navigation.

The app comes with many preset items, from ordinary boxes to books and CDs, and high-quality representations of the most popular mobile laptops, tablets, phones, and even computers. The objects are rendered in 3D and can rotate and zoom into the preview area.

Selecting the object you are interested in will be the initial step. The next step is to look through the different features to handle the appearance, camera location, shadow, light reflection, and other specific colors and textures. Displays and phones' screens can be fitted with customized pictures or backgrounds that are transparent.

Export options can also be advantageous. You can save static images or create animations using two choices. Image formats, including PNG, JPG, GIF, and BMP, can be configured to fit different sizes. For animations, it is possible to create the following formats: AVI, SWF, or GIF file that depicts an image of the camera's rotation or the object.

With everything in mind, Insofta Cover Commander is the program that can create professional images of items to be included on your store's website or just as enhancements to your design. A variety of pre-designed objects, many properties to manage, and diverse export options to satisfy the needs of most customers, can be utilized.

It is no doubt that you can take an impressive-looking photo of a box in Adobe Photoshop. How much time are you willing to spend mastering this seemingly straightforward job?

Cover Commander provides more precise control in creating an ideal 3D box shot and mockups such as E-Book, DVD 3D text business cards, brochures, laptops, iMac, iPhones, iPad Pro, Nexus Blu-ray disc Display, and more. And removes the steep learning curve associated with any general-purpose graphics editor.

Insofta Cover Commander Great Features:

- Compose a scene from several 3D objects.
- 3D mockups: 3D text, 3D primitives (Sphere, Cylinder, Cone, Pyramid, Cube), Box, Box with the disc, Disc, Screenshot, Curved screenshot, DVD box, DVD box with the disc, Book, Softcover book, Business card, Brochure, Flyer, Postcard, Plastic Card, Book with rounded corners, Manual, Vista box, Spiral book, Laptop, iPad Pro, iPhone X/6s/SE/5c, iMac, Samsung Galaxy S6, Nexus 9, iPad 2/3/4 with cover, Display, Blu-ray box, Blu-ray with the disc, Monitor, TV, CD box, CD box with the disc.
- Let the built-in wizards do the dirty work for you and focus on the artistic details of the cover.
- Create multiple projects, and parse multiple images - with a single command (batch mode).
- Save the resulting image with transparent background and use the picture for complex web or print designs.
- Save the light, shadow, and reflection settings under a unique name and use those settings in other projects.
- Set the result image size (up to 4000 x 4000) and margins in pixels.
- Draw your customer's attention with an animated (WebP, APNG, GIF, SWF, AVI) box, cover, or screenshot.
- Don't pay more than what it costs to create a great cover. Create additional covers at no cost at all!
