This Preset package includes 13 scenic Lightroom filters. All these express a particular mood and the coloring is frequently inspired by Renaissance painters and their earthy tones using a contemporary touch to it. On the Majority of them I used grain to Improve this disposition, but Don't Hesitate to reduce or Even eliminate it under the consequences class. Not every filter is Acceptable for Every picture. I suggest playing around with the snowy balance/temperature and Brightness slider, as the sweet spot differs from each image separately.
