

BeaconFence v1.3 (22 Aug 2022) Support Rad Studio 11.2 Alexandria Full Source

2024-12-18 23:02:30

BeaconFence lets you use the Geofencing features of your application. BeaconFence is an improved System.Beacon.TBeaconManager now embeds a new BeaconFence Map Editor to help you design a map of a physical space of interest, such as a geographic area, a building, or in general any real or virtual environment you may desire to create.

BeaconFence Great Features:

- Monitor beacons and trigger proximity events.
- Define zones and trigger proximity events for entering the zone, exiting the zone,, and approaching zone.
- Compute the position of your BLE mobile device automatically on a map.
- Calculate a route between points of interest in a map.
