OrgChart JS v7.5.48

2026-09-27 21:56:46

OrgChart JS is a visual tool used by supervisors to illustrate the functions and a company's hierarchy. Whether you are a company, nonprofit, or government organization, a graph can help your employees understand the chain of control, with clear info on which individuals report to that supervisor. Using an accurate graph, you're going to have the ability to come up with growth plans and assign new jobs. A definite organizational chart can help you map inefficiencies in your office.

OrgChart JS is a straightforward and direct association chart plugin. Anytime you desire a tree-like graph, then you can turn to OrgChart.

OrgChart JS is a simple, flexible, and extremely customizable business graph plugin for presenting your company's construction and the relationships tastefully.

OrgChart JS enables developers to create an easy, flexible, and extremely customizable business graph for elegantly presenting structural information.

- Grouping -- Placing several nodes into a single box saves a significant quantity of space compared to assigning every node their particular box. By way of instance, if you've got two workers at precisely the same level, you'll be able to group them.
- Assistant nodes - attorneys are child nodes with a distinct relationship with the parent node. They're laid out in a committed portion of the shrub.
- Expand/Collapse - If you are working on a large, complex OrgChart, you can fall everything except the area you would like to concentrate on.
- Search - If Organization Chart gets too large, an integrated search area lets users search and emphasize nodes.
- Performance -- Support tens of thousands of nodes with no performance impact.
- Multi-format exports - OrgChart JS can export data to PDF, PNG, SVG, and CSV.
- Supports both local information and remote data (JSON).
- Smooth expand/collapse effects according to CSS3 transitions.
- Align the graph in 4 orientations.
- Enables the user to modify org chart construction by drag/drop nodes.
- Enables the user to edit the org chart dynamically and rescue the last hierarchy for a JSON object.
- Supports exporting graph for a picture or pdf document.
- Supports zoom and pan.
- Enables the user to personalize the inner arrangement for every single node.
- Users may embrace numerous options to develop a massive business chart(please refer to multiple-layers or hybrid design sections).
- Touch-enabled plugin for cellular apparatus.
