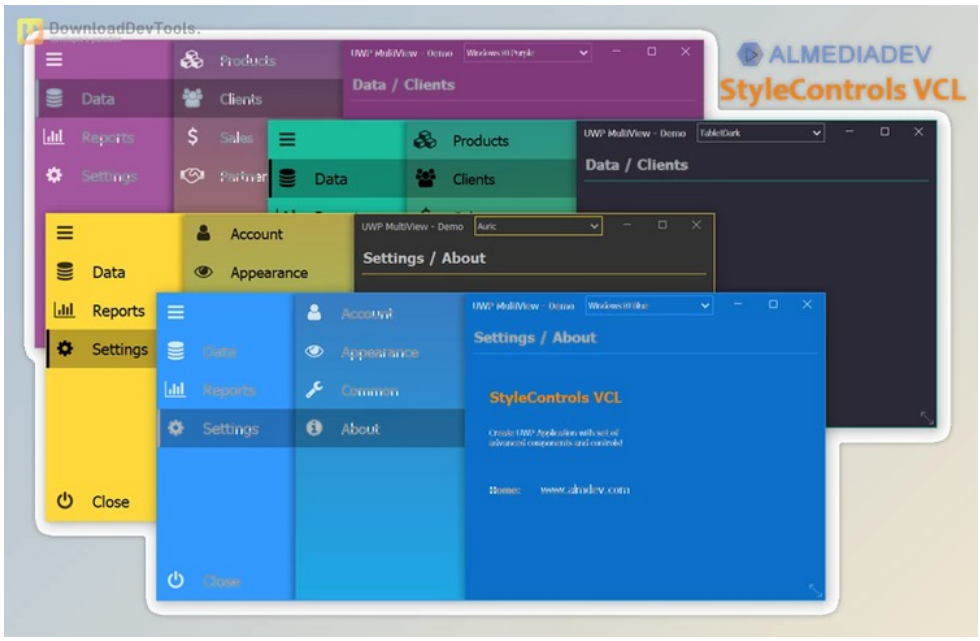
AlmediaDev StyleControls v5.85 (12 Sep 2025) for Delphi & CB XE2-12 Athens Full Source

2025-09-17 09:08:33



AlmediaDev StyleControls is a robust package offering over 100 components to enhance standard VCL controls for Delphi and C++Builder applications. Leveraging Classic drawing, system Themes, GDI+, and VCL Styles provides a stable and powerful solution. With native support for VCL Styles, the package eliminates the need for style adapters for standard controls and includes a comprehensive collection of professional styles from Embarcadero and DelphiStyles.

Key features of **AlmediaDev StyleControls** include the creation of UWP-like applications with Fluent UI Blur Background, DWM shadow, and hit test support. It seamlessly integrates with Windows 10 and 11 Fluent UI, offering excellent support with Acrylic Blur Background and customization options combined with VCL Styles. The package excels in high-DPI support, ensuring optimal performance on systems with any DPI. Advanced controls, including those based on GDI+ vector graphics, add visual appeal, while special features like "PerMonitorV2" DPI Awareness and compatibility with DevExpress controls enhance overall functionality.

also provides unique solutions for creating modern applications, such as Windows 10 and 11 Fluent UI Light Effects on buttons and alpha blend transparency for styled menus. With 64-bit support and a myriad of customization options for adjusting styles and themes, **AlmediaDev StyleControls** offers a comprehensive solution for developers seeking to elevate their applications' visual aesthetics and functionality in Delphi and C++Builder environments.

Key Features of **AlmediaDev StyleControls** :

1. Support of classic drawing, system Themes, and VCL styles in all elements and controls
2. Set of controls for creating Windows 10 and 11 Modern UI Applications with UWP/Fluent UI design
3. Controls for Modern Applications with Ribbon UI
4. Windows 10, 11 Fluent UI Acrylic Blur Background support
5. Fluent UI Light Effect on buttons with pressed animation
6. Collection of controls based on GDI+ vector graphics, including buttons with various shapes and vector glyphs
