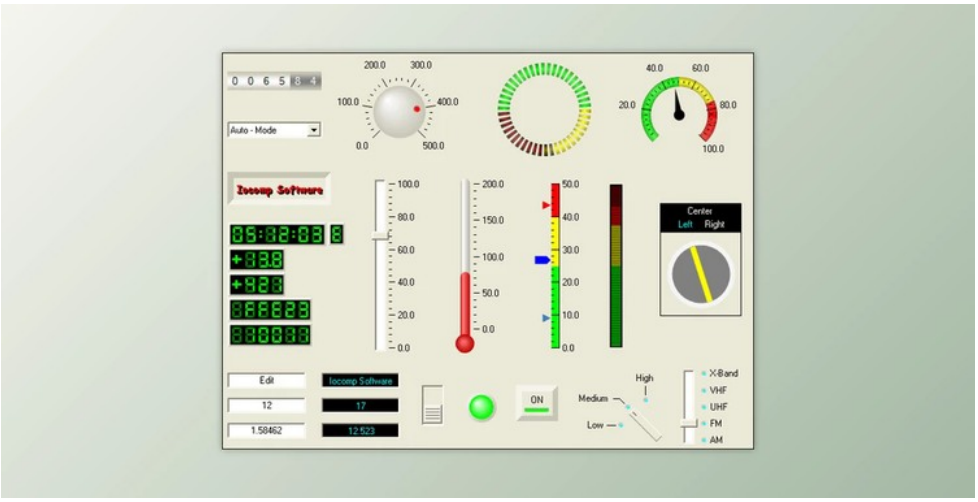
Iocomp .Net v5.0 SP2 (10 Aug 2018) for .Net 4.0

2026-10-14 13:25:16



The Iocomp .NET WinForms Ultra Pack controllers were composed in C# and take whole advantage of GDI+. They create instrumentation controls with professional looks and tight integration to Microsoft's .NET Framework. Custom Property Editors offer fast-and-simple setup eliminating tough home window hunting. The Ultra Package includes 55 Instrumentation Professional Bundle Controls and also the Plot Pack Component.

Iocomp's Ultra Package is a package of 56 controllers for use in producing skilled instrumentation applications. These controllers are made in 100% managed code and service Microsoft and Borland/CodeGear/Embarcadero growth environments. Combines our Guru Bundle & Plot Package.

All controllers are oriented and discuss many common courses for consistency, easy to use, and interfacing. Each controller is optimized to find the best possible performance below the .Net Framework whilst still employing the innovative GDI+ drawing patterns, which greatly enhance the controls' appearance. Most controllers only need a single line of code when interfacing for a program. Each controller has an integrated customized property editor for ease of installation.

These controllers May Be Used for Scientific, Engineering, Medical, Oil and Gas, Maritime, Semiconductor, Factory Automation, Aerospace, Telecommunications, Military, Building, and Home Automation, Power Systems, Robotics, Colleges, Labs, HMI, SCADA, along with hundreds of other kinds of applications.

Iocomp .Net Amazing Attributes:

- Real-time, high-speed controllers.
- Professionally made to operate like real-world controllers.
- Built-In custom property editors for ease of installation.
- GDI+: Anti-Aliasing, Gradients, and added Line & split styles.
