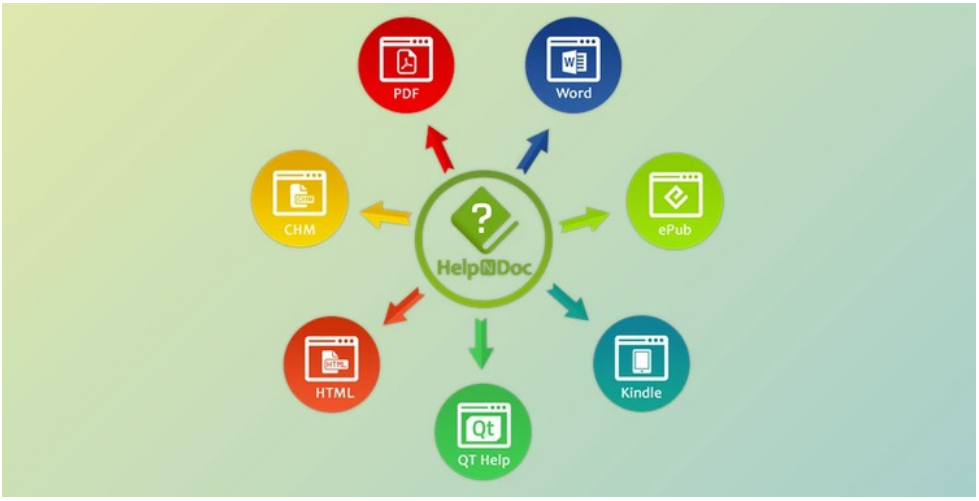
HelpNDoc Personal Edition v8.9.0.604

2025-03-24 13:44:55



HelpNDoc is a contemporary **help authoring tool** using an intuitive user-friendly interface. Compose or import your articles and create over **7 documentation formats** such as help files, web sites, user guides, files, eBooks...

Benefit from a totally thought-out, **clean,** and **easy** user port to **speed-up** the intricate task of assistance and documentation.

HelpNDoc endeavors may be exported to assist documents, web sites, files, and eBooks. It supports **batch export**, **conditional generation** in addition to **innovative customization choices**.

HelpNDoc is an easy to use yet powerful help authoring tool that may create different documentation formats from one source: HTML and CHM help files, PDF and Word manuals, ePub and Kindle eBooks, cross-platform Qt Assist files in addition to cellular web-sites such as iPhone and Android. Forget about bloated user interfaces and incomprehensible help authoring applications: HelpNDoc provides the most advanced functionalities in their simplest form. Making HTML and CHM help files is usually a painful process but thanks to HelpNDoc you may surprise yourself enjoying it! Producing Word and PDF guides, ePub and Kindle eBooks and Qt Support is as simple while the wonderful template engine will allow you to create iPhone or Android particular documentation sites in a snap. Now you understand how to use Windows explorer and your favorite word processor? Then you already understand how to use HelpNDoc: it's that simple! Add to that many powerful features like live spell checking in a fully WYSIWYG (What You See Is What You Get) environment, a brand new template engine, an integrated networking library, a job analyzer, and you will start to imagine how fast and easy it's going to be for you to make your next help file and how professional it will look like.

Creating documentations, such as help files, user guides or some other similar kind of source wouldn't be possible without utilities which may accumulate the required info and piece it together at a mutually familiar type.

1 such tool is similar to **HelpNDoc Personal Edition** as well as the purpose that it was made to function becomes evident just by taking a look at its name.
