

Embarcadero RAD Studio XE5 Update 2

2024-12-18 23:03:15 [label](#) [我要反馈](#) [下载页面](#)

The Embarcadero RAD Studio XE5 was designed to be a game-changer that enables the developers and the users to build native apps rapidly. This app is very rich with experience in multiple single code design and devices. Today there is a big challenge and it is that the software development organizations now have to deliver the best business which is across the ever-expanding list which belonged to the devices. With the help of the Embarcadero RAD Studio XE5, the developers are now able to deliver the native apps that are for Android, Windows, and OS X devices just within a fraction of minutes of the time and cost related to the other solutions. RAD has many benefits and some of them that are eye-catching can be the following:

- **Native Android and the iOS Supports:** With the help of these apps, the users can now easily develop the true native Android and iOS apps which are for the smartphones and the tablets that account for the largest mobile markets being addressable today. This platform includes access to the mobile devices that are common and the sensors and services with the use of the on-device, cloud, and enterprise data.
- **One Codebase and one team:** The team of the developers can both prototype and develop the native apps in the C++ standard or the Delphi language of programming for multiple device use simultaneously. This means that there is no need for multiple projects, budgets, and schedules. Tools, languages, and libraries are also to be targeted on each device platform.
- **Multi-device application Platform:** The Embarcadero RAD Studio XE5 has the best ingredients that are used for the Multi-device application platform. This is very ideal and good for the on-premise or in-cloud platforms which are to deliver enterprise data as well as some services to the apps. Developers along with the users can now tackle and solve enterprise challenges of the BYOD and can even ensure that their app is not only running on the multiple devices but it is supporting the multiple services that are backend. This process happens both from inside the corporate as well as the cloud.
- **What customers say:** The iPad app was created with the RAD Studio that was an entrance system for one of the biggest families in Austria. Now they are developing a point of sale which is a solution for Windows, Mac, and also Android. This level of development would never be possible if the RAD Studio was not there. Luckily the customers are liking the solutions that are provided by the developers.
- **Availability:** The RAD Studio XE5 is very much available from the Embarcadero from the partners of the Embarcadero. For further details about the pricing and the new updates, the user can visit the Embarcadero and once the user is registered, there can be discounts provided for those particular users.

Embarcadero RAD Studio XE5 Amazing Attributes:

Authentic native Support: With the help of the RAD Studio XE5, the users can now create native Android and iOS programs that are genuine in nature. The platforms such as mobiles and tablets are the biggest cellular markets on the planet and they have access to solutions and can be shared as device sensors and utilization of the information that is business based or even the on-device and the cloud.

One Codebase, one team: The team of the developers stimulates and creates both programs that are conventional in the C++ and the Delphi languages for the purpose of obtaining several concurrent devices. This means that there is no requirement for several plans, jobs, and a huge amount of budget.

The Embarcadero RAD Studio is the best alternative left in the market for the offering of the accurate and exact native, CPU executable code for all four platforms that are the Android, Mac, iOS, and Windows. In the RAD Studio XE5, the users are empowered to make and create programs, and these programs in the native applications run on the hardware of the device and have no interpretive or even scripting layers that enable the users the best experience possible ever. According to a survey, 85% of the Windows programmers are engaged and tasked with the creation of 85% and the program favors are just about 17%.
