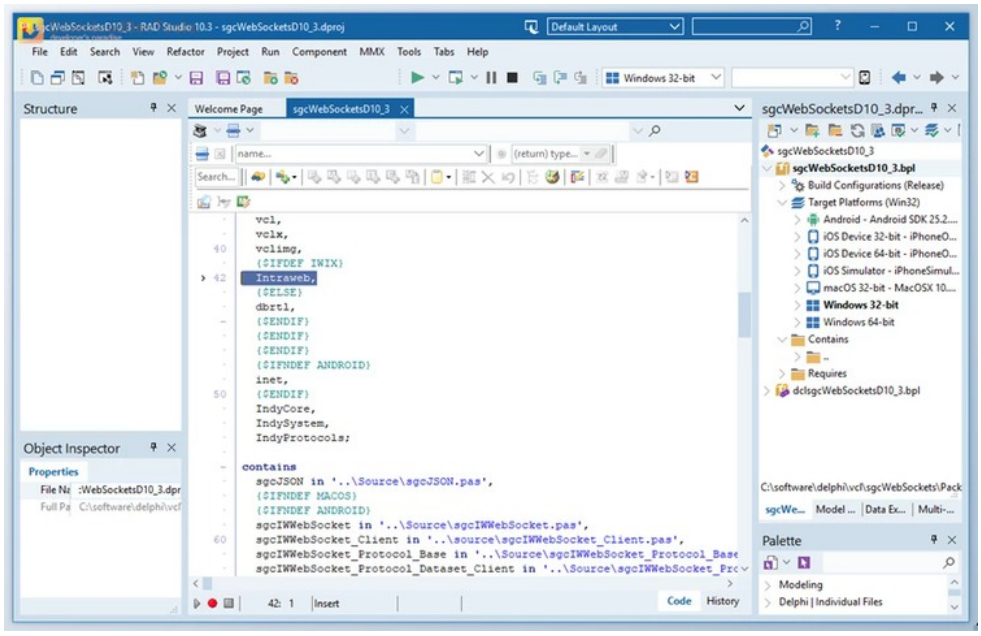
ESEGECE sgcWebSockets Enterprise v2023.5.0 (June 2023) for D7-D11 Alexandria Full Source

2025-12-02 15:34:09



ESEGECE sgcWebSockets Enterprise is a versatile solution providing robust client and server-side implementations of the WebSocket protocol (RFC 6455) and comprehensive support for HTTP/s. This cross-platform library, compatible with Delphi, .NET, and CBuilder, offers a wide range of features, including secure message transmission through SSL/TLS, support for various protocols like MQTT, WebRTC, and seamless integration with third-party APIs such as Pusher and Bitfinex.

Noteworthy components include a Delphi WebSocket Client supporting OAuth protocol and JWT Tokens, a Delphi HTTP Client with advanced HTTP/2 support, and two server options based on Indy library and HTTP.SYS Microsoft API. sgcWebSockets Enterprise goes beyond basic functionality, incorporating advanced capabilities like crypto trading support for platforms such as Binance and Coinbase Pro, cloud solutions for AWS, Azure, and Google Cloud, and integration with OpenAI components for harnessing artificial intelligence in applications.

In addition to its extensive protocol support, extends its reach to P2P applications, providing direct communication and seamless sharing between users. The library also integrates with various WebSocket protocols, cryptocurrency exchanges, communication tools like Discord and Telegram, and trading platforms such as XTB, CryptoHopper, and 3Commas. This comprehensive suite positions **ESEGECE sgcWebSockets Enterprise** as a powerful and adaptable solution for a wide array of web and application development scenarios.

Key Features of **ESEGECE sgcWebSockets Enterprise** :

1. Client and server-side WebSocket protocol implementation (RFC 6455)
2. Full support for HTTP/s
3. SSL/TLS implementation with compatibility for TLS 1.3 and TLS 1.2
4. Cross-platform compatibility (Delphi, .NET, CBuilder)

所有软件资源 100%安全 已检测 无病毒 无篡改
