TMS VCL Chart v4.4.6.2 (24 Feb 2025) for Delphi & CB 7-12 Athens Full Source

2025-07-23 10:40:55

TMS VCL Chart is a robust framework for Windows VCL and FMX development, integrating seamlessly with the FNC Framework to ensure compatibility across platforms, including VCL, FMX, and TMS WEB Core. With a unified codebase, developers can efficiently create visually stunning charts using components like TAdvChartView and TDBAdvChartView. These components offer many customization options, supporting various chart types, orientations, and advanced features such as annotations, legends, and scrolling functionalities. The framework's design-time integration enhances the development process, allowing easy extension and customization.

For users seeking enhanced graphics and performance, offers components like TAdvGDIPChartView and TDBAdvGDIPChartView, leveraging GDI+ for anti-aliased drawing, gradient support, opacity effects, and more. These components provide advanced features like zoom control, exporting to multiple image formats, and optional glass mirror effects, ensuring high-quality chart visualization. Additionally, TAdvChartView3D brings 3D chart capabilities using OpenGL rendering, enabling users to create immersive visualizations with configurable legends, titles, and export options.

Overall, **TMS VCL Chart** components offer a comprehensive solution for creating dynamic and visually appealing charts in Windows VCL and FMX applications. With a wide range of features, customization options, and platform compatibility, developers can leverage **TMS VCL Chart** to enhance their applications with powerful charting capabilities, catering to diverse project requirements and delivering a seamless user experience across platforms.

Key Features of **TMS VCL Chart** :

1. Full compatibility with VCL, FMX, and TMS WEB Core for versatile development options
2. Single high-performance multi-platform codebase for seamless integration and enhanced performance
3. Easily extendible with numerous customization options and events for tailored development
4. High-quality graphics rendering for superior visual representation of data
5. Enhanced design-time integration for efficient development workflow
6. TAdvChartView & TDBAdvChartView: Multi-pane and DB-aware chart component supporting various chart types and customization options
7. TAdvGDIPChartView & TDBAdvGDIPChartView: GDI+ enabled chart components with advanced features such as anti-aliasing, gradient support, and opacity control
