Espresso v5.9.1 for macOS

2025-01-06 23:20:07

The web editor on Mac has returned. For those who create beautiful, exciting and fast websites. With an application that is suited to the task. Espresso lets you create, code, and publish efficiently and with flair. The sophisticated text editor comes with excellent Live Preview that includes Browser Xray, CSSEdit tools, and tools for the Navigator, Dynamo auto-building, and Server Sync. No matter if you're beginning from scratch or modifying a live website, Espresso has you covered.

Browser Preview as well as Xray. Local project? Take advantage of the fastest auto-refresh on the market. The layout of your website can be X-rayed to edit the relevant styles easily. The most important thing is that it works. It is compatible with Chrome, Firefox, and Safari (including Technology Preview).

Overrides using Live Styling and Xray. Modify CSS to live websites and watch your design change in real time. There is no requirement to post, load, or even save. Espresso is the only program that Espresso lets you play with live projects. This is enjoyable and easy, and it's also non-destructive and straightforward to use.

CSSEdit Toolkits for Supercharged Style Sheets. The latest version of Espresso allows you to create high-quality standard CSS, flexible SCSS, and LESS. Styling is easy thanks to the gorgeous Navigator, Dynamo auto-building feature, and stunning Live Preview and Overrides connectivity. The award-winning CSSEdit Visual tools, as well as the code formatting tools, are now available inside Espresso. They include frictionless editors for gradients, colors, layouts, shadows, and more - accessible for both dynamic and standard CSS. Everything is working flawlessly.

Espresso for macOS Great Features:

- **Zen Snippets**
  Zen shortcuts let you combine and expand abbreviations based on tags and custom snippets.
- **Toolbar Favorites**
  Customize your toolbar with contextual actions, snippets, and menus for quick access.
- **Re-Indent**
  Bye-bye, messy code. Apply custom spacing by example. Works for HTML, CSS and JavaScript.
- **Templates**
  For files, folders, or projects. Use a built-in one, or save your reusable bits—a real-time-saver.
- **Workspace**
  Now with the flexibility of tabs while integrating even more smoothly with your project files.
- **Open Quickly**
  Switch between documents without taking your fingers off the keyboard. It's Go time.
- **Solid Basics**
  Zippy editing. AdSense. Folding. Indentation guides. Bracket balancing. All there, quietly helping.
- **Multi-Edit**
  Make many changes at once, not one change many times. Multiple selections make renaming things a breeze.
- **Navigator**
  No mere function menu. Effortlessly navigate your code structure with groups, style previews, and Quick Filter.
- **Language Support**
  Out of the box: HTML, (S)CSS, LESS, JS, CoffeeScript, PHP, Ruby, Python, Apache, and XML. Extensible with syntax plug-ins.
- **Fantastic Find**
  Needle and haystack no more. Project Found and Replace, Quick Filter, and colorized regex make searching through files or text a breeze.
- **Plug-In Power**
  Espresso comes with an extensive plug-in API for actions, syntaxes, formatting, and more. Check out the Power
