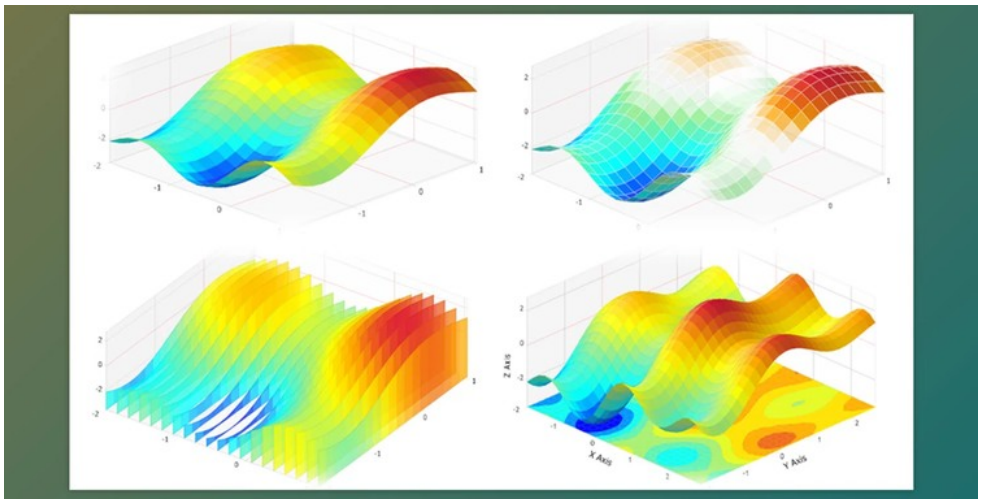
# WebAvail .netCHARTING v10.6 (14 Dec 2023) for WinForms & WPF & ASP.NET MVC

2025-07-17 15:39:13



.netCHARTING empowers your web site to show vast amounts of dynamically generated information easily and quickly. Constructed with 100% managed code with C# and supplied with large samples in VB.NET and C#, this high-performance charting controller also comprises feature-rich information entry and aggregation system together with translation support. We continue to add functionality and value (including the judge and dial graph added in 2.5, the geographical map graph and vector graph in 4.0, AJAX scroll/zoom in 5.0, organizational charts from 5.1, electronic dashboards graphs in 6.0, TreeMap graphs in 6.1 and JavaScript HTML5 Charts at 7.0, Circular Gauges in 9.0) plus a committed ASP.NET MVC graph package in 10.0 all comprised with no add-on buys needed.
