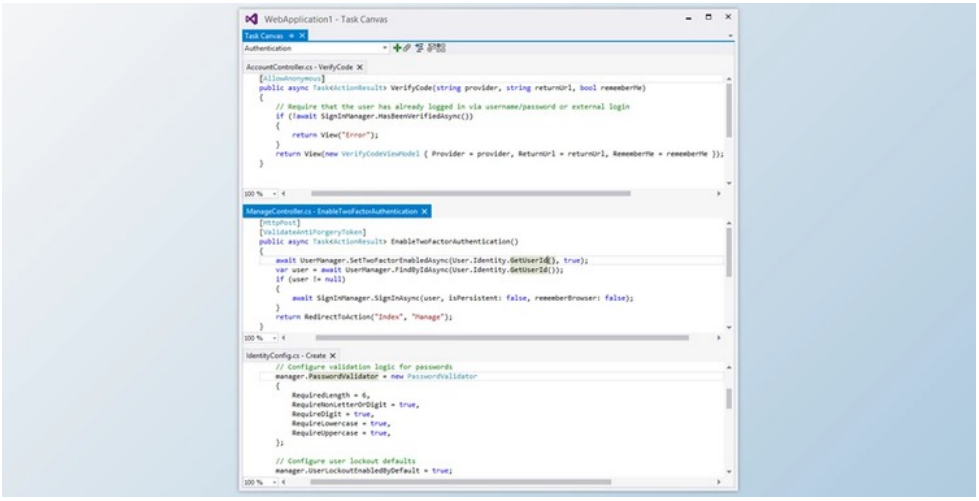
Vlasov Studio Task Canvas v3.0.2 (15 Mar 2022) for VS 2017-2022 Pre-Activated

2026-10-14 13:19:28



The Task Canvas permits the user and developer in order to edit a multiple code fragment that are available concurrently in a single window right in the visual studio 2017 and 2019. It has the capability to reduce the shifting of the tab as well as developing right from the place to place in a file. Right in the sub menu of the Task Canvas from the visual studio editor context menu the user has the ability to increase the tasks canvas window as well as the entire document and also to present a procedure in the correct please select a text or even the definition of the procedure under the caret for the users and the developers. However, the process of adding the procedure as well as the definition function just like the definition of the peek from the visual studio has the ability to open the gold limited for the code blog which belongs to the tasks canvas window. The user has the ability to reorder the cubes of the code in a single job by the process of dragging the code block tab, and also dropping the same code in a different tab. It is possible for the user to open the source of the file at the normal Visual Studio tab for the user chosen code blog by simply clicking on the button which is corresponding at the toolbar of the tasks canvas.

Vlasov Studio Task Canvas Great Features:

It has the following features and attributes that are stated as below such as:

- The user has the capability to rename a code block by the process of clicking on the corresponding button which is available on the canvas toolbar.
- It permits the user in order to open the source of the document right in the tab of the standard Visual Studio.
- The user has the capability to add notes as well as comments for free along with the instructions or even the temporary text edits.
- The task canvas interface has the capability to reduce the information overload in order to make it very easy for the multitasking processor.
- It is considered to be very useful whenever the user has the periodic task or even at work in different tasks parallel.
- The information of the task is basically stored personalization in the same directory along with the user file.
- It permits the user and developer in order to copy the notes or even the code blocks as well as the tabs and the startup projects.
