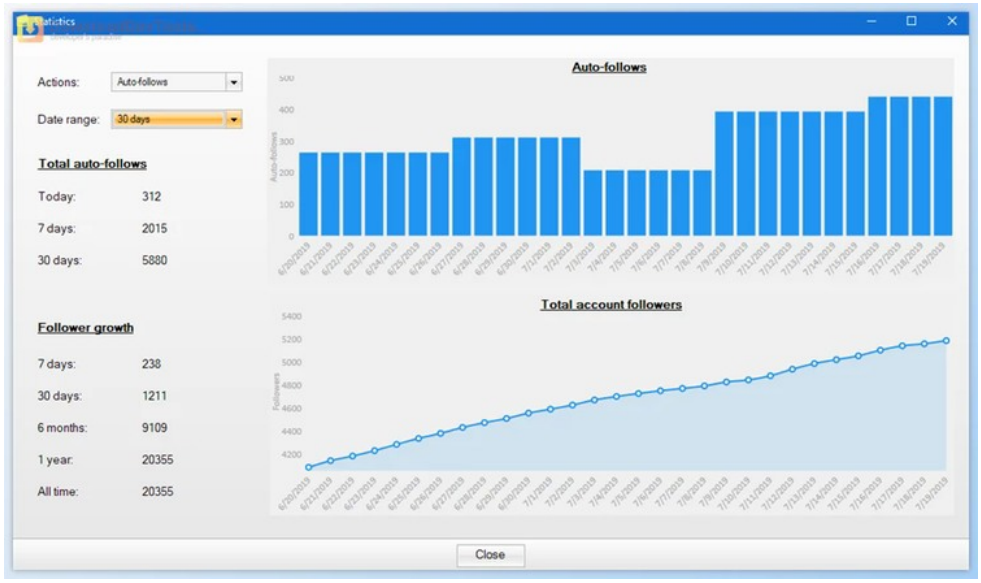
ThreadNinja v1.4.0

2025-03-09 23:16:32



provides an all-encompassing platform to manage your Threads account growth without any effort. The application performs automatic user following and unfollowing and posts liking as well as commenting and content reposting functions by utilizing intelligent target selection alongside protection features. **ThreadNinja**, as a platform, helps users manage their Threads account with simplified interaction features, no matter their engagement or monitoring needs. You can monitor all your activities through its tracking system to identify the most effective strategies that drive growth on your account.

Modern targeting features and timer-mode functionality ensure stable control when you automate your Threads interactions. ThreadNinja users can set breakdowns in advance and install proxies to boost privacy, whereas the platform lets users generate personalized contact lists to restrict interactions to specific people or groups. Users needing to adjust image dimensions for their content will find **ThreadNinja** their optimal solution. ThreadNinja has that covered, too. This tool benefits influencers, marketing professionals, and businesses who want to enhance their Threads visibility without dedicating all their daily time to it.

Key Features of **ThreadNinja**:

1. **Auto-Follow & Auto-Unfollow** – Follow and unfollow users based on smart filters like activity, follow-backs, and time-based rules.
2. **Auto-Like & Superlike** – Like thousands of posts instantly, target specific hashtags, or deeply engage with users by liking multiple posts.
3. **Auto-Comment** – Leave automated comments from a preset list or let AI generate meaningful responses.
4. **Auto-Repost** – Repost trending or relevant content from hashtags and keyword searches to keep your profile active.
5. **Smart Targeting & Monitoring** – Engage only with relevant users by filtering based on follower count, bio keywords, or verified status.
6. **Track Growth & Engagement** – Get analytics on your interactions and adjust your strategy for maximum impact.
7. **Multiple Targeting Options** – Engage with another user's followers, commenters, search results, location-based users, and more.
