Winsoft ComPort for macOS v2.8 for Delphi 10.3-12 Athens Full Source

2026-09-06 23:11:47

Winsoft ComPort for macOS is a Delphi component designed to facilitate serial communication within macOS applications. It enables seamless interaction with devices connected to the serial port, offering developers a straightforward solution for integrating serial communication capabilities into their Delphi applications. It is compatible with Delphi versions 10.3 through 12 and ensures versatility across different development environments.

With the , developers gain access to a reliable toolset for communicating with serial devices, simplifying the incorporation of such functionality into their applications. The component provides essential features for serial communication, enhancing the overall user experience. Additionally, the registered version includes the complete source code, providing developers with transparency and flexibility for customization.

A notable advantage of the **Winsoft ComPort for macOS** is its royalty-free distribution model, allowing developers to integrate the component into their applications without additional licensing fees. This ensures cost-effectiveness and scalability for developers seeking to implement serial communication capabilities in their macOS applications.

Key Features of **Winsoft ComPort for macOS** :

所有软件资源 100%安全 已检测 无病毒 无篡改
