It's not a secret that our painting textures are among our top sellers. the brand new ones are stunningly rendered even though we believe we've got them "just right"!

Don't be deceived by the name of pastels as these textures are full of depth. They have a lot of metallic, iridescent verdigris, as well as mirror-smooth textures to give the slightly more grippy look that a lot of us Metallic enthusiasts love. They also have a transition to the more delicate, misty pastels as the name suggests.

We've found a way to squeeze 10 additional Textures into this set. That's more than 50 full-size textures! We loved them so much we couldn't bring ourselves to eliminate the extras you'll see here. We've also gotten to work and have already designed and published a number of images using the Pastel Textures which have proven to be extremely popular. We will happily share recipes over the next few weeks with you in your summer adventure!

Flypaper Pastel Painterly Pack contains 50 rectangular-shaped textures with minimum dimensions of 4000x5000 pixels. The textures have a standard of industry printing of 300dpi.

All of our textures are compatible with any editing software that allows layers Photoshop and Photoshop Elements, Gimp, and more. You can also use the textures available on iPad, Android, and smartphones if you've got an installed Photoshop Touch app installed. They can only be used within Lightroom when you have an add-on that allows Lightroom to use layers, such as the Perfect Layers.
