The GrapeCity is described to be a privately held as well as multifunctional software that has its base in Sendai Japan.  Is capable of developing its software products as well as providing outsourced products to the developer and the users or the process of development services, Consulting Services software as well as customer relationship Management Services and so on.  It has been established in order to design the production which is digital along with its facility in Japan.  The major office location of the GrapeCity is located in the United States, Japan, India, China, and last but not least Vietnam.  The first product of this company was the lesser service which was provided for the school management in the year 1970. Later the company was able to expand into a range of software products as well as services and began to localize the developer tools for the market and there was an empty niche that they were able to discover when they developed this service. It should be noted that the GrapeCity has been award-winning Microsoft with a gold certificate partner this is considered to be one of the world's largest provider of component for the process of developing.  For almost 40 years it has been providing enterprises all around the world with tools and components, services as well as software, solutions, and so on.  The product in this case is capable of providing developers and the users along with designers and architects with nothing but a collection of very easy to use tools for the process of building and creating sleek, making it a high performer completing the feature of the applications and so on. It is capable of delivering rich as well as responsive desktop and applications of web and mobile did users and developers and it is very flexible as well as extensible.  It has the ability to start with core control and then expand in order to meet the user requirement.  It has a lot of samples as well as top-notch which are able to support as well as guarantee the user app and this app is limited only by the imagination of the user. It is able to make a small footprint but at the same time make a big impact. The GrapeCity has a small footprint and it does not bloat the apps of the user business. It contains a unified base code that has the ability to shorten the user's learning curve with a very similar as well as a familiar code from the user desktop to the native mobile phones.

## The GrapeCity has a lot of great features and attributes and they are stated below as:

- It is capable of supporting Microsoft Visual Studio and its features.
- It has a unique design just enhancing the design-time experience on the framework of the .NET for the users.
- It has the ability to extend the control of the user with the help of smart tags.
- Can perform data visualization, navigation, scheduling as well as a calendar, and finally the management of grids and data.
- Contains dozens of themes that are built-in.
- It is customized in order to create user themes along with designers.
- It contains a clear style of technology in the control of the user XAML.
- It is capable of providing software development services as well as product development that is outsourced along with the Consulting Services of implementation.
- It has the ability to simplify most documents that are robust excel formats.
- Has the ability to produce custom clocks, along with grids, dashboard as well as other types all together with the comprehensive API for its users and the developers.
- It has the power to oversee the strong as well as a high-speed engine for calculation.
- The process of importing as well as exporting the Excel documents.
- It has the actual support for JavaScript and support typescript as well as Angular.
- As the entire support for the Vue and react.
- When it comes to designing the JavaScript on the spreadsheet that is very similar to excel then in this case importing, editing as well as exporting the document of excel as well as utilizing the templates that are built-in, and the creation of one based on the user is possible.
