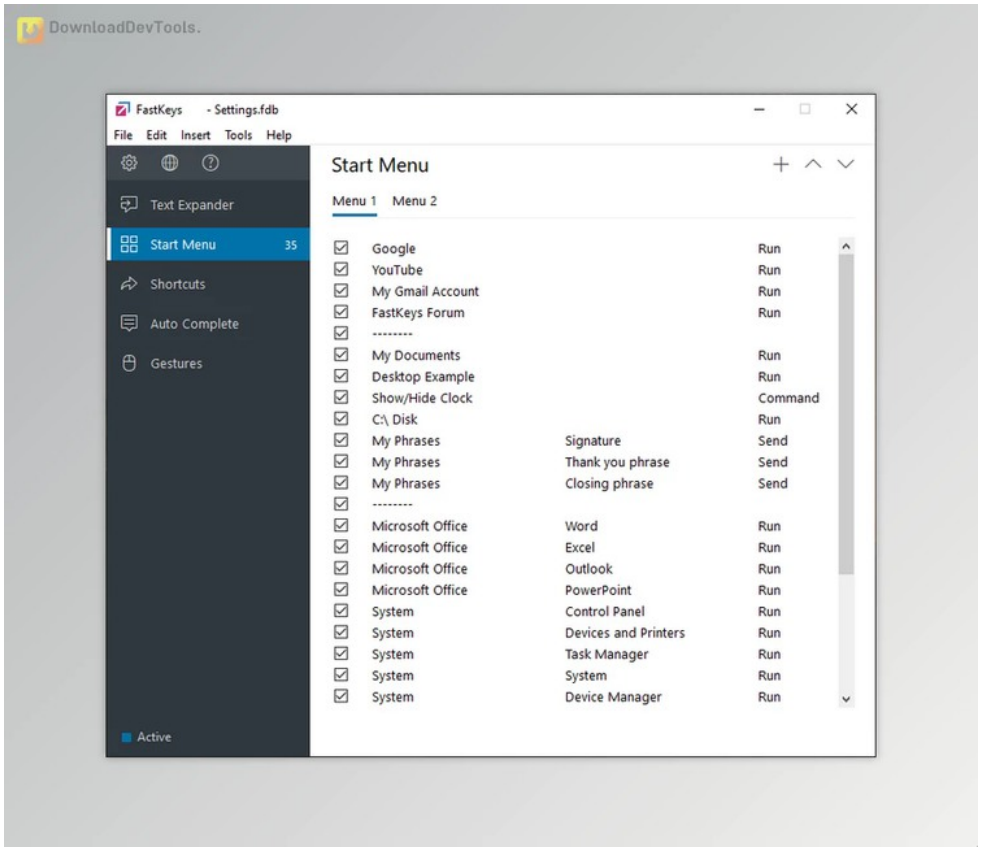
FastKeys Pro v5.14 Multilingual

2025-04-16 20:17:18



FastKeys Pro is a powerful automation software designed to streamline computer tasks and enhance efficiency. It allows users to configure programs for different activities, assign keystrokes, create abbreviation strings for frequently used text, and manage mouse gestures. The software is equipped with a universal spelling correction feature, making it an invaluable tool for saving time on typing.

One standout feature is the ability to build a fully configurable Start Menu accessible by touching the screen edge, providing quick access to various activities across any program. **FastKeys Pro** is highly customizable, featuring options for creating text templates, ensuring ease of use and adaptability. It includes additional functions such as Volume Control, Clipboard Manager, and Macro Recorder, making it a comprehensive solution for automation needs.

is user-friendly, versatile, and suitable for corporate use. It allows for the presetting and locking user preferences, enabling custom settings for deployment installations according to corporate policies. The software supports multiple users with auto-loaded company common settings locked for editing. With silent installation and no need for end users to enter license information, **FastKeys Pro** offers a seamless and efficient automation solution for various tasks in any Windows program.

Key Features of **FastKeys Pro**:

1. Configure programs for different activities
