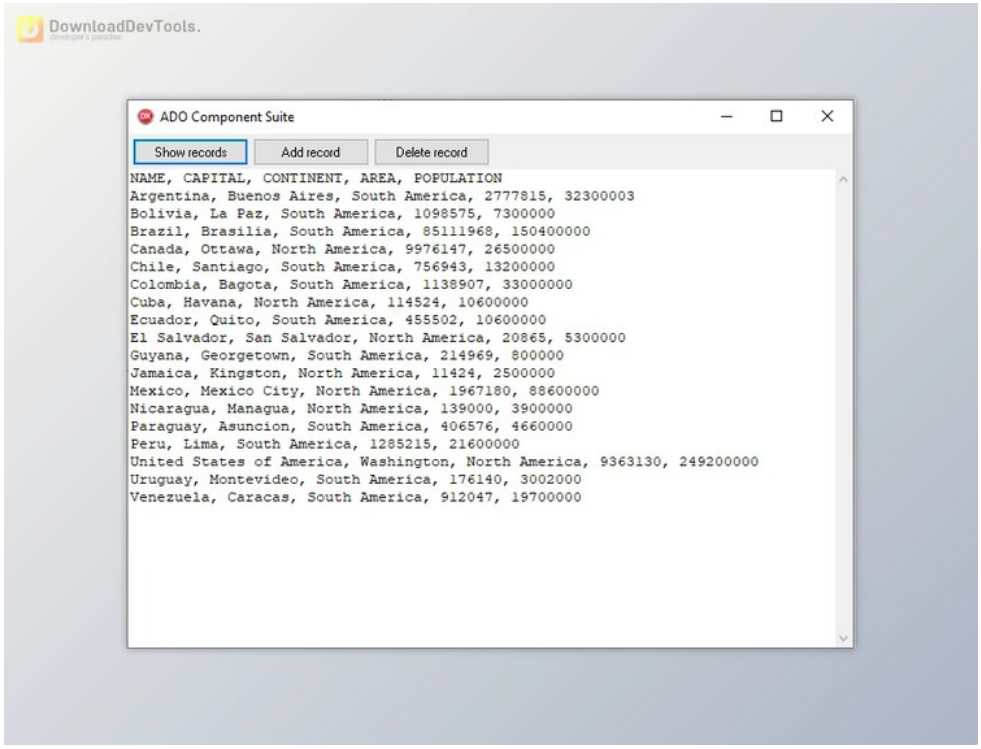
Winsoft ADO Component Suite v5.3 for Delphi & CB 5-12 Athens Full Source

2026-10-09 16:07:04



Winsoft ADO Component Suite comprises Delphi and C++ Builder components designed for universal data access through ADO (ActiveX Data Objects). Functioning as a thin wrapper for ADO objects, this suite is particularly adept at constructing application servers and clients, offering an alternative when the TDataSet capabilities of Delphi/C++ Builder are unnecessary. It seamlessly utilizes the Microsoft ADO library, facilitating direct access to ADO objects.

is integral to the broader Adonis Component Suite, providing compatibility for Delphi/C++ Builder versions 5 through 12 and Lazarus 2.2.6. Including source code in the registered version ensures transparency and customization capabilities for users. Additionally, the suite allows for royalty-free application distribution, enhancing its flexibility for developers.

Key Features of **Winsoft ADO Component Suite**:

1. Utilizes the Microsoft ADO library
2. Offers direct access to ADO objects
3. Compatible with Delphi/C++ Builder versions 5 through 12 and Lazarus 2.2.6
4. Includes source code in the registered version
5. Allows royalty-free distribution in applications
