ManageEngine Analytics Plus v4.5.6 Build 4560 Professional Multilingual

2025-01-04 21:37:41

Analytics Plus is also an on-premise business intelligence and IT analytics application that allows you to produce rich visualizations and interactive dashboards. Strong cross-data data and analytics mixing permits you to combine data from several programs and produce unified dashboards. Integrates out-of-the-box with ManageEngine's IT products package such as ServiceDesk Plus, Programs Manager, OpManager, and Service Center Plus.

Searching for options to ManageEngine Analytics Plus? Lots of Individuals need IT Portfolio Analysis Software. What is hard is finding out whether the applications you pick is perfect for you. TeamViewer, Talkdesk, Dynatrace, and NICE inContact would be the most well-known choices and competitions to ManageEngine Analytics Plus.

Integration with ServiceDesk Plus assists Analytics Plus in enhancing IT service delivery functionality and efficacy with greater insight into your ITSM data. Pick from over 100 reports and dashboards constructed on over 80 KPIs or personalize them to produce your own personal, with no information specialist.

ManageEngine Analytics Plus Great Features:

- Documents and feeds

  Upload data from flat files like .CSV, .XLS, .HTML, .JSON, .XML, and .TSV whilst extracting information from internet URL feeds.

- Synchronize using SQL databases like Oracle, MSSQL, MySQL, PostgreSQL, Amazon RDS, Amazon Redshift, Microsoft Azure SQL, Google Cloud SQL, Heroku PostgreSQL.

- Data mixing

  Blend and combine data across various tables. As an instance, you can combine sales amounts with advertising investments to look at your advertising and marketing campaigns' functioning.

- Our report builder's drag-and-drop lets you build complex reports, even when you're not a professional. Your information will seem familiar, presented as a menu, which makes it much easier for you to use.

- Visualization variety

  Pick from more than 30 graphs, widgets, pivot tables, and tabular views to represent your information. Alter visualizations on the fly.

- Smart dashboards

  Blend several accounts into one, live dash. Add pictures, formatted text, widgets, and internet elements in a flexible designer design. Our interactive dashboards help analyze and assist you in making better choices.

- Strong formula engine

  This constructed-in formulation engine and its own extensive library of statistical and mathematical purposes give you the power to derive metrics from the raw data.

- Fine-grained access control

  Maintain whole control on what your coworkers or customers can view and douse the reports you discuss. Pick access permissions, which range from read-only to complete ownership of shared information.

- Publish and email

  Let your accounts come to you. Schedule reports and dashboards and have the results emailed to you—export or print
