Analog film is fantastic and has amazing visual concepts. There is a lot to learn from the analog film, so I took the knowledge I gained and came up with four looks that work for fine art portraits but are also usable too. The goal was to keep the look as brief as is possible and keep it simple and easy to create an easy-to-understand and simple-to-edit look.

Because there are only four designs and everything is based upon simplicity, I decided to name this Project Little thing, because it's those little details and the small details that are the cake on top of the cake, that little extra effort that's important. While creating I was listening to my four most-loved songs that had Little on the cover, and immediately named the styles in honor of them.
