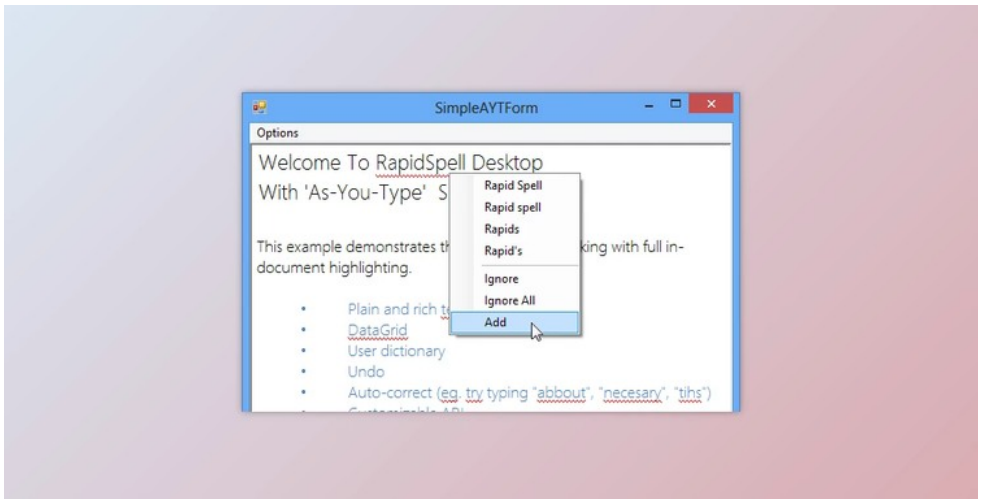
Keyoti RapidSpell Desktop .NET v6.1 Ratail

2026-09-04 12:06:00



Keyoti RapidSpell Desktop .NET Insert as-you-type and dialogue spell checking functionality into .NET Windows software.

RapidSpell Desktop .NET permits you to add spell checking value to any textual application (email, word processor, etc) with a couple of lines of code. RapidSpell Desktop can also be utilized in non-GUI contexts using its spell checking API. Composed for .NET at C#, RapidSpell uses combined and separate 140,000 words U.S. & U.K. dictionaries (and user dictionary), multi-threaded GUI, and a powerful suggestion engine. Dutch, French, German, Spanish, Portuguese, Brazilian Portuguese, and Medical Dictionaries accessible.

RapidSpell supplies 3 cookie elements to include spell check functionality to your software; RapidSpellDialog (conversation-based checker controller), RapidSpellAsYouType (as you type check controller) along RapidSpellChecker (core spell checker course).

Integrate as-you-type and conversation spell checking functionality in your Windows Forms .NET program.

Add spell checking value to any textual application (email, word processor, etc) with a couple of lines of code.

RapidSpell Desktop .NET may also be utilized in non-GUI contexts using its spell checking API. Composed for dotNET at C#, RapidSpell uses combined and separate 140,000 words U.S. & U.K. dictionaries (and user dictionary), multi-threaded GUI, and a powerful suggestion engine.
