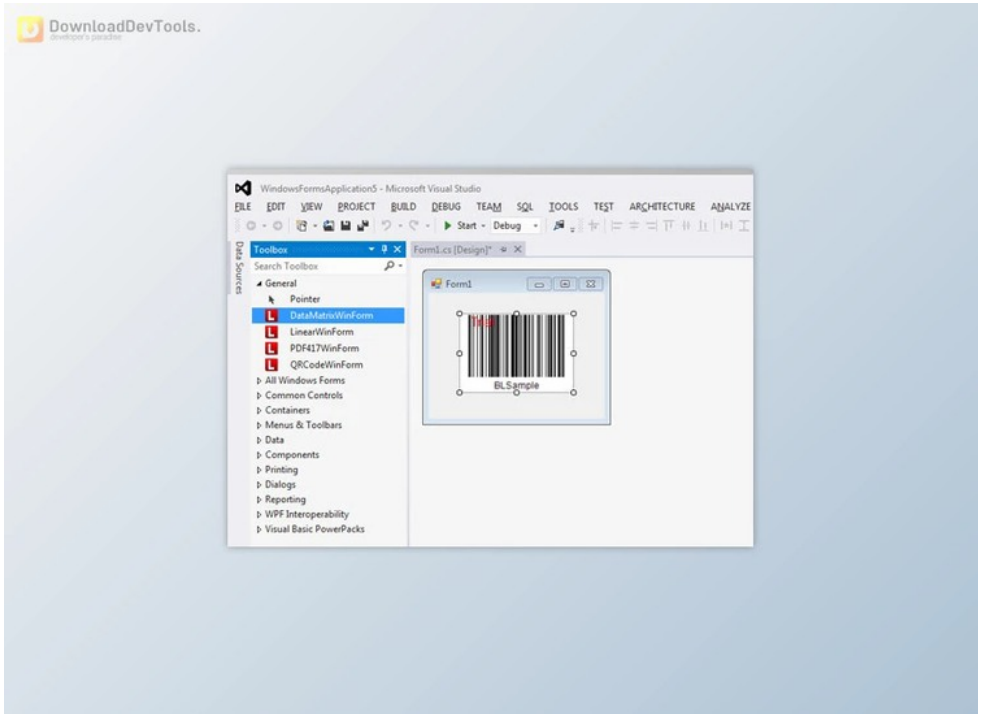
BarcodeLib v7.0.0.40510 (WinForms & Crystal & Cross & Barcode Reader)

2026-10-07 08:31:35



offers a mature and robust barcode reading and generation solution across various .NET platforms, including .NET class libraries, ASP.NET web services, Windows applications, and .NET console applications. Designed to be versatile and easy to use, **BarcodeLib** supports linear and 2D barcodes, making it ideal for diverse retail, logistics, and inventory management applications. With comprehensive support for the latest barcode standards and symbologies like Code39, Code128, Data Matrix, and QR-Code, **BarcodeLib** ensures compatibility and reliability for your barcode needs.

This .NET suite includes a range of components tailored for different applications, including ASP.NET, Windows Forms, and popular reporting tools like Microsoft Reporting Services, Crystal Reports, and RDLC Reports. **BarcodeLib** allows developers to generate barcodes effortlessly in C# and VB.NET, offering flexible image formats such as JPEG, GIF, and PNG. It's a popular choice among developers for its ease of integration and managed code base, providing a straightforward way to embed barcode generation into various applications without the need for activation keys or additional licenses.

BarcodeLib is a versatile and user-friendly tool for developers seeking to add barcode functionality to their .NET applications. It ensures high-quality and reliable barcode generation across various use cases.

Key Features of **BarcodeLib**:

1. Easy drag-and-drop functionality for ASP.NET and Windows Forms
2. No need for activation keys or registration codes
3. Fully managed code in C# for optimal performance and compatibility
4. Compliance with the latest barcode standards for linear and 2D barcodes
5. Capability to generate barcodes in multiple environments, including web services, desktop applications, and reporting tools

所有软件资源 100%安全 已检测 无病毒 无篡改
