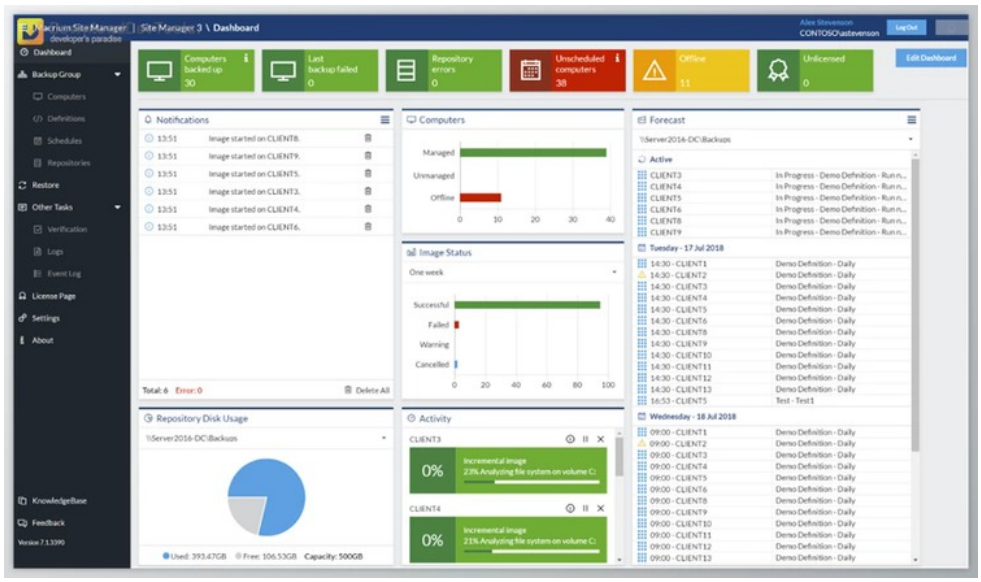
Macrium Site Manager v8.1.8602 for Win x64

2025-10-02 01:40:14



Macrium Site Manager streamlines the management of multiple instances of Macrium Reflect through a user-friendly interface, offering enhanced security and rapid recovery capabilities at scale. With features like remote syncing to cloud storage platforms, centralized scheduling of backups, and universal rescue media for streamlined restoration processes, Site Manager 8 ensures simplicity, flexibility, and scalability. It empowers organizations to safeguard their data effectively, minimizing downtime and enhancing confidence without adding complexity or extra expenses.

Moreover, provides transparency through built-in events management features, scalability by easily managing agent licenses or standalone Reflect instances, and security through automated scheduling and remote syncing capabilities. Transitioning to Site Manager is seamless for existing Macrium users, requiring only the uninstallation of Reflect from individual machines and the input of license keys into Site Manager for automatic license assignment. **Macrium Site Manager** offers two configuration options to cater to diverse needs, with deployed agents being the preferred choice for most scenarios.

Key Features of **Macrium Site Manager** :

1. Remote sync to cloud storage platforms, such as S3.
2. Centrally schedule intra-daily backups.
3. Restore all machines with a single USB stick with universal rescue media.
4. Transparency through built-in events management features.
5. Scalability by managing Macrium Agent Licenses or connecting to standalone Reflect instances.
6. Security and reliability are ensured with automated scheduling and remote syncing capabilities.
7. The seamless transition for existing Macrium Reflect users requires only license key input for automatic assignment.
8. Two configuration options are available for flexible deployment: deployed agents or standalone instances.
