Stimulsoft Reports v2025.3.5 for Avalonia UI (.Net 6.0 & 8.0)

2026-04-08 08:08:06

Stimulsoft Reports for Avalonia UI is a cross-platform reporting program designed to work with Avalonia-based applications written in. NET Core, .NET 6, .NET 7, and .NET 8. It is compatible with Windows, macOS, and Linux, and allows you to generate, read, and export professional reports right on Windows Avalonia projects. It is highly scalable in design, features a modern UI, and is highly performance-oriented, which makes it an ideal choice when developers are creating scalable apps.

The product also contains a fast and adaptive report viewer, and it is where the majority of the users spend their time. It is compatible with such features as interactive reports, drill-downs, and parameter handling. Anything can be stylized and made to suit your project design. The C# code, properties, and events grant developers complete control as well, and make Avalonia apps easily interoperable.

Stimulsoft Reports for Avalonia UI can be connected with a broad range of data sources, such as MS SQL, MySQL, PostgreSQL, Firebird, and so on. It also has support for OData services, files such as XML, JSON, and Excel. It can easily and easily be added to your project with dedicated extensions to Visual Studio and Rider.

Key Features of **Stimulsoft Reports for Avalonia UI**:

1. **Cross-platform support** – Build once, run on Windows, macOS, and Linux with Avalonia UI and .NET Core/6/7/8.
2. **Report Viewer** – Fast and customizable viewer with parameters, drill-downs, interactivity, and resource handling.
3. **Wide data connectivity** – Connect to SQL databases (MS SQL, MySQL, PostgreSQL, Firebird), OData, and file formats (XML, JSON, Excel, etc.).
4. **Flexible integration** – Export, print, and view reports directly in your app, with full control via C# code, properties, and events.
5. **Developer-friendly setup** – Free extensions for Visual Studio and JetBrains Rider make integration quick and easy.
6. **Modern UI and performance** – Leverages Avalonia's API for a consistent, scalable, and visually appealing experience.
