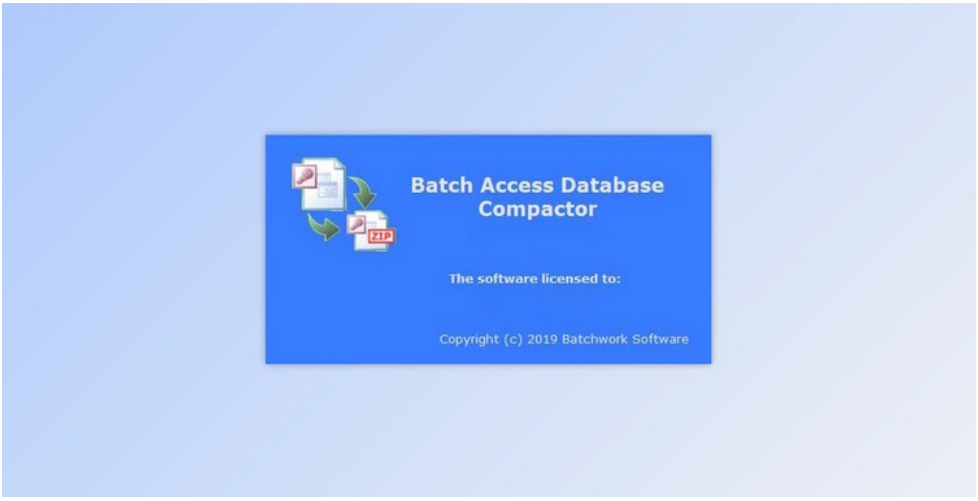
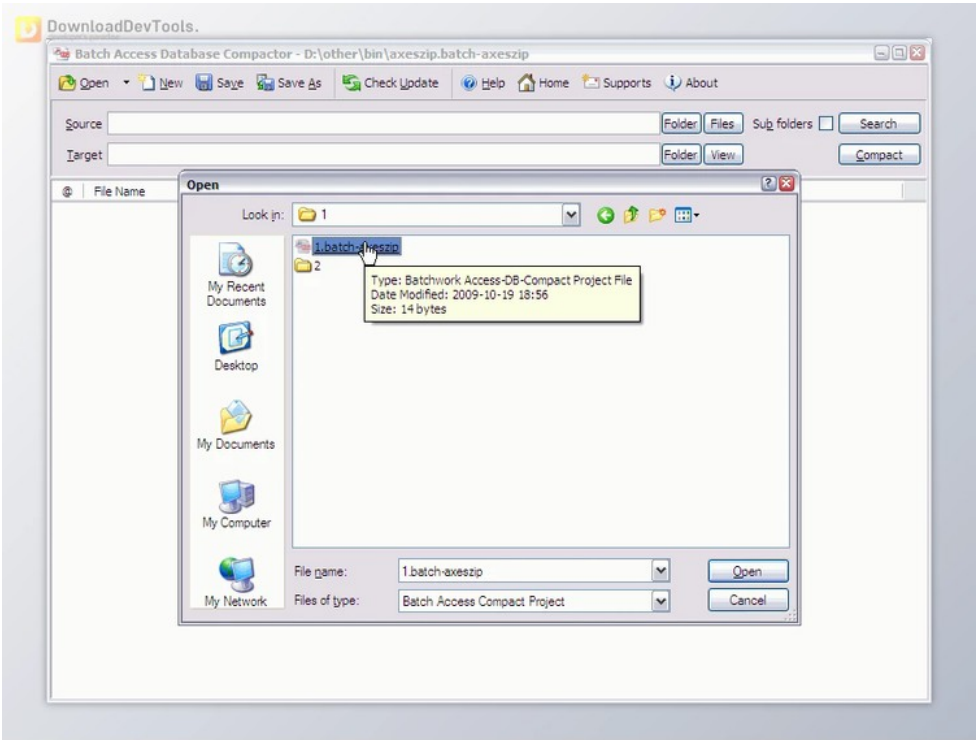
Batch Access Database Compactor v2025.17.916.2621

2025-11-09 16:39:44





is a simple yet powerful tool for managing Access databases. It helps you easily compact and repair your database files without installing Microsoft Office. Whether dealing with a single Access file or several at once, this software is designed to handle both, making your database management more efficient. Its intuitive interface ensures that users of all experience levels can navigate and use it easily.

One of the standout features is its ability to process multiple files simultaneously with a fast, multi-threaded compression engine. You can pause, stop, or resume compression tasks whenever needed, giving you full control over the process. The tool also supports drag-and-drop functionality and Windows Explorer integration, making it even more convenient to manage your Access databases. You can save your compression tasks in a project file for future use, which you can run directly from Windows Explorer or the command line.

Batch Access Database Compactor is compatible with various Windows operating systems, from XP to Windows Server 2012. Whether you're a casual user or a professional managing large databases, this tool is a reliable solution for keeping your databases compact, fast, and error-free.

Key Features of **Batch Access Database Compactor** :

1. Compact and Repair Databases: Easily fix and shrink Access database files (MDB/ACCDB).
2. Batch Compression: Compress multiple Access files simultaneously with an intuitive GUI and search function.
3. Folder Compression: Compress all the Access files within a folder.
4. Windows Integration: Supports drag-and-drop and context menu in Windows Explorer for easy file management.
5. Batch Projects: Save compression tasks in a reusable project file that can be run from Windows Explorer or the
