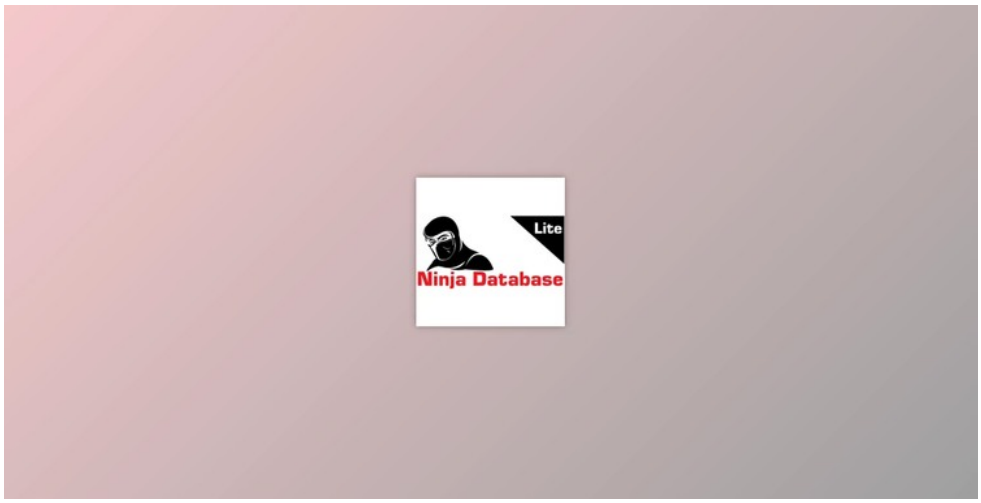
Kellerman Software Ninja Database Lite v3.15 (21 Dec 2021) Retail

2024-12-18 23:04:45



Ninja Database Lite is described to be a No SQL database of key-value for the framework of .NET as well as the standard of .NET Purdue user and developer. It consists of around hundred KB as well as it has a built-in for a high performance operation. It has the ability to easily save as well as blood any public object to the storage of the file or even an isolated storage. The entire graph of the object can be saved and the Ninja Database Lite has the ability to use a custom binary serialization library in order to save the data in a compact format for the user and the developer. The database has the ability to be created as well as compressed or the library can be used in order to increase or even compress or the files in isolated storage or even a storage of file. It has the ability to be purchased separately and the product he's also included in the gold suite for the user and the developer. The subscribers of the gold suite are capable of receiving new products as well as new upgrades for free up to a year as an annual subscription.

Kellerman Software Ninja Database Lite Great Features:

It has the following features and attributes that are stated as below such as:

- The tiny configurations are capable of saving or even loading an object with the help of a single line of code for the user and the developer. Example can be seen the demo which is in the C# as well as the VB.NET that are included. The help file basically has the ability to contain code example for all the methods as well as the properties that are present.
- The process of encryption with the industry standard as well as the secure AES encryption is possible.
- It is described to be having hundred percent managed code which is written in the C#.
- With the use of the binary serialization instead of the serialization of the JSON it makes a big difference in the size of the database which is present and turning on the compression is capable of making the database even look smaller.
- It is capable of providing a royalty-free distribution to the users.
- The user has the ability to purchase today and receive all the upgrades for free up to next year.
- The user has the ability to receive the refund within 60 days if the user is not satisfied with the product.
- It is capable of providing a lifetime email technical support to the users and the developers.
