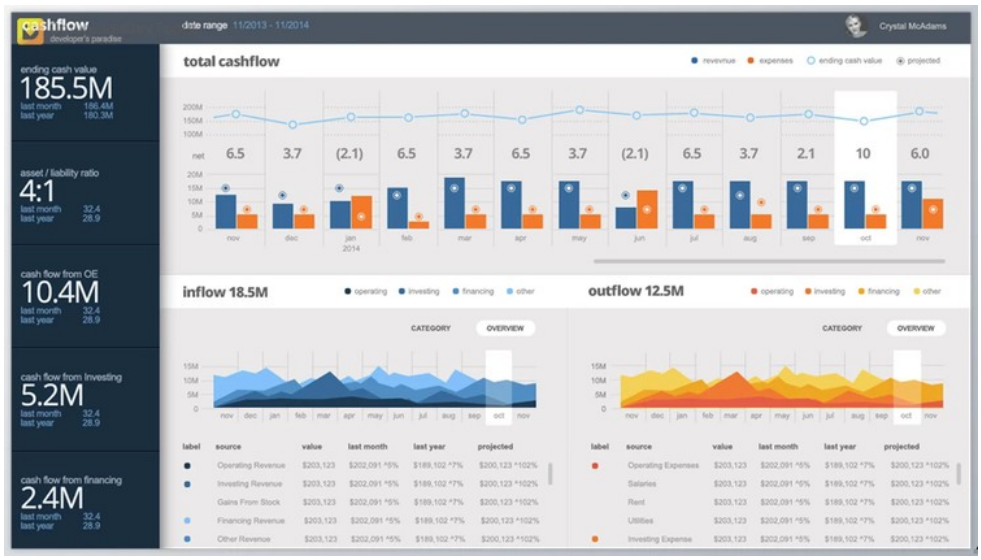
Infragistics Ultimate v2024.1 (08 Aug 2024) with Samples & Help

2025-09-22 01:45:13



provides powerful tools to help you build beautiful, high-performing apps across various platforms faster than ever before. With a focus on simplicity and attention to detail, our tools empower teams to create digital experiences that are both elegant and highly productive. Whether you're developing web or desktop applications, our extensive library of UI controls, grids, charts, and design-to-code capabilities ensures you can build, customize, and deliver apps in half the time.

For businesses looking to make smarter, data-driven decisions, our business intelligence solution, Reveal, makes it easy to embed analytics into your apps and connect with cloud platforms like Microsoft Azure, Google BigQuery, and AWS. Teams can boost collaboration and productivity with Slingshot, our all-in-one digital workplace that organizes projects, data, and communication to deliver better results.

From Angular and React to ASP.NET, Blazor, and Xamarin, **Infragistics Ultimate** offers comprehensive support for building apps on any major platform. With various tools designed for everything from financial data visualization to mobile app development, it provides developers with the flexibility and speed needed to create exceptional user experiences.

Key Features of **Infragistics Ultimate** :

1. Cross-Platform Development: Support for Angular, React, ASP.NET Core, Blazor, Xamarin, and more allows you to build web, desktop, and mobile apps.
2. UI Controls & Components: Hundreds of pre-built UI controls, including high-performance grids, charts, and financial data tools, are designed to speed up development without sacrificing quality.
3. Design-to-Code Platform: A complete design-to-code solution featuring a web-based WYSIWYG drag-and-drop IDE, which simplifies building modern, responsive apps.
4. Business Intelligence with Reveal: Easily integrate advanced data analytics into your apps and connect to platforms like Azure and AWS for real-time insights and smarter decision-making.
5. Team Collaboration with Slingshot: Streamline communication, project management, and data sharing across teams with a digital workplace to enhance productivity and trust.
6. High Performance: Fastest data grids and charts for web and desktop platforms optimized for handling large datasets with smooth, responsive interactions.
