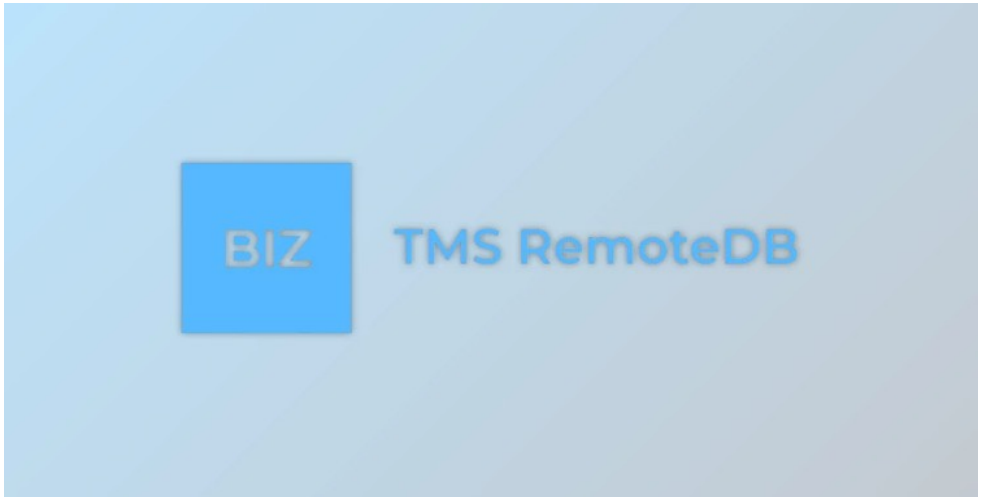
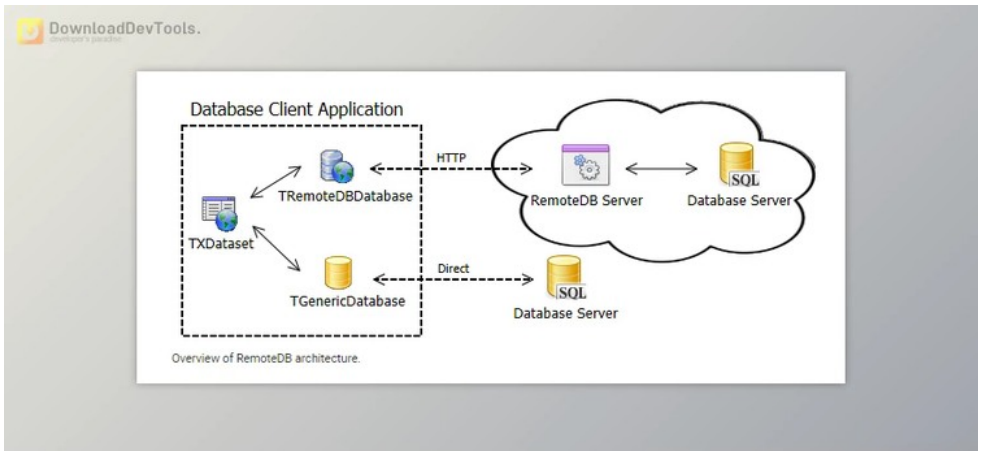
TMS RemoteDB v2.23.0.1 (13 Mar 2026) for Delphi XE2-13 Florence Full Source

2026-09-27 21:54:55





TMS RemoteDB streamlines database application development, facilitating a swift shift from traditional client-server setups to efficient 3-tier architectures. Its remote SQL operations on an HTTP server ensure seamless cross-platform compatibility across Windows, macOS, iOS, and Android. With minimal code modifications, existing Delphi applications seamlessly transition to TMS RemoteDB, retaining component behavior and optimizing performance.

At its core, **TMS RemoteDB**'s server functionality listens to HTTP requests, forwarding them to the designated database server via chosen components like FireDac and dbExpress. This adaptable approach enables precise server-side configurations and smooth compatibility transitions for developers. Secure HTTPS protocols safeguard data integrity, while transparent response handling ensures efficient client-server communication.

On the client side, **TMS RemoteDB** offers HTTP client support across platforms, guaranteeing seamless interaction with RemoteDB services. Transparent response handling and secure communication extend to Windows, macOS, iOS, and Android clients. Integration with TMS Aurelius ORM framework simplifies migration, requiring minimal code adjustments for scalable, high-performance 3-tier architectures. Overall, empowers developers to create versatile, cross-platform database applications effortlessly, enhancing scalability, performance, and compatibility.

Key Features of **TMS RemoteDB** :

1. Seamless transition from client-server to 3-tier architecture
2. Cross-platform compatibility: Windows, macOS, iOS, and Android
3. Minimal code changes required for migration
4. Preserves existing component behavior
5. Optimized memory usage for enhanced performance
6. Flexible server-side configurations with various database-access components
7. Secure HTTPS protocols ensure data integrity
8. Transparent response handling for efficient communication
9. Integration with TMS Aurelius ORM framework for streamlined migration
10. HTTP client support across platforms
11. Scalability to handle growing data demands
12. Blazing-fast performance for SQL operations

所有软件资源 100%安全 已检测 无病毒 无篡改
