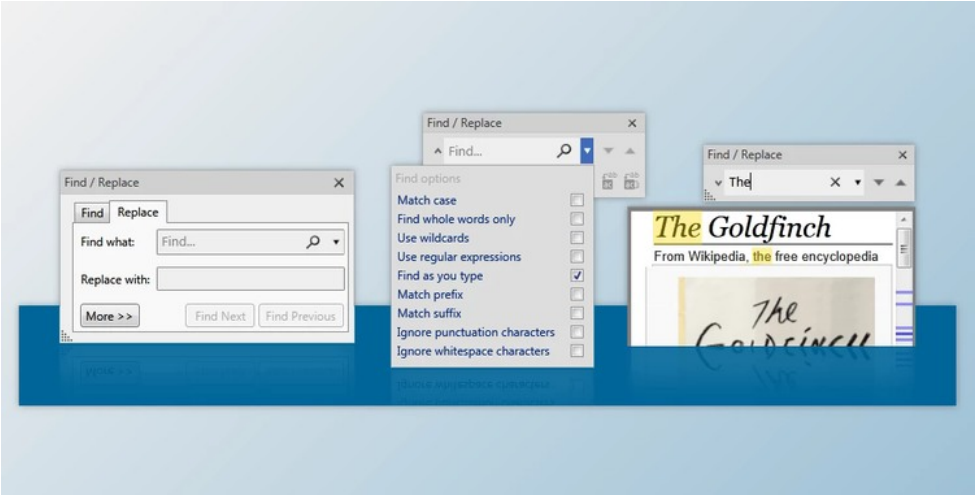
Keyoti RapidFindReplace WPF v1.0 Ratail

2026-09-06 23:14:07



RapidFindReplace WPF permits developers to rapidly incorporate a strong find & replace dialog instrument to WPF programs. Boost user experience with the capacity to track down & replace text strings inside text boxes, files, and dozens of controllers. RapidFindReplace also includes advanced user options such as Wildcards, Regular Expressions, Case Sensitivity, Complete Word, and a lot more.

- 'Locate only' or find and replace' style.
- Templated
- Support for broad Selection of WPF controllers, e.g.;
  - TextBox
  - RichTextBox
  - ComboBox
  - DataGrid
  - Label
  - ListBox
  - ListView
  - TreeView
  - FlowDocumentPageViewer
  - FlowDocumentScrollViewer
  - Button (disabled by default)
  - IContentHost Controls
  - The non-visual assortment of Run objects (i.e., Strings)
  - Controls with these as child controls (e.g., UserControl, Window, etc.)
- Multiple user choices like those in Office applications
  - Locate as consumer forms (inline highlighting)
  - Case fitting
  - Entire words only
  - Wildcards
  - Regular expressions
  - Prefix/suffix only fitting.
  - Ignore whitespace
  - Ignore punctuation
