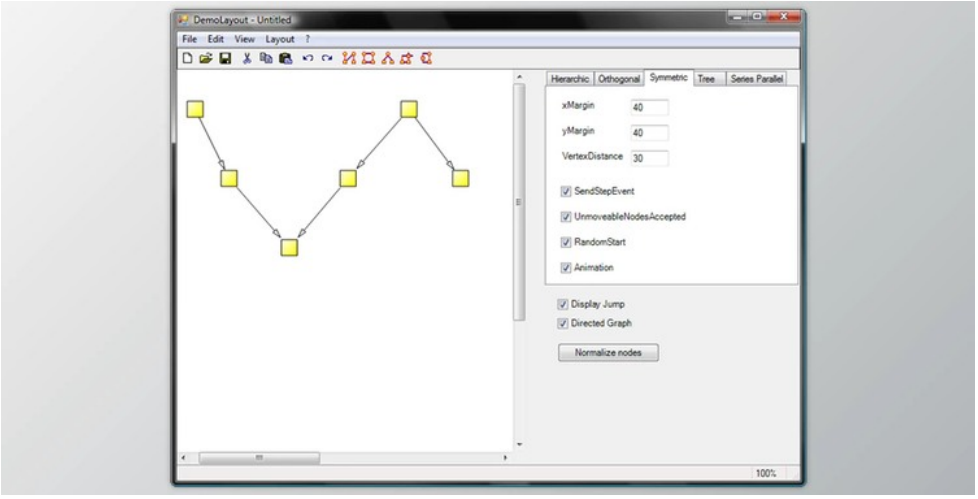
# AddFlow for WinForms 2015 build 3.0.2.1 (01 Mar 2017)

2026-10-09 16:09:57



Add Flow for WinForms is described to be a form of custom control which is very useful each and every time that the user desires to display and use a relationship which is between the object in the application of the user, the workflow diagram as well as the database diagram, along with the communication Network, the chart of the organization, State transition diagram and the call center of telephone, the customer relationship management, along with the graph theory, expert system, management of the diagram quality, and a lot more to be mentioned. The professional version has the ability to contain a pair of graph layout as well as algorithmic such as the hierarchy, force directed, series parallel and a few more. It permits the user and developer in order to quickly create a flowchart and enables the HTML5 application just like the workflow diagram, database diagram and so on. The professional version of Fate has the ability to provide a set of graph layout algorithm to the user and developer and also a royalty-free distribution. It should be added that the Add Flow is basically a custom control which is created by the Microsoft it says and has the ability to provide a small deployment assembly along with the light programming interface to the user and developer. Drawing of the visual objects in order to obtain the lightweight way to perform the drawing as well as the full integration with the environment. The user has the ability to order either a standard edition or even a professional edition of the Add Flow. The professional edition it should be added that has the ability to provide a set of graph layout algorithm to all its users.

## AddFlow for WinForms Great Features:

It has the following features and attributes that are stated as below such as:
