SubSystems HTML to PDF Converter v18.0 for .Net

2025-01-12 20:23:50

HTML to PDF Converter delivers a very simple and hassle-free way of switching from HTML to PDF format in your program. You may make only 1 function call to perform the conversion.

HTML into PDF Converter can use Internet Browser control to supply for page rendering like IE.

On the other hand, the controller also supplies a Native style performance that does not utilize the Web Browser control or a different third party controller.

HTML to PDF Converter supports the following attributes:

- Hyperlinks *(external and internal)* in the created PDF document. Once clicked in an internal connection in the created PDF document, the file will jump into the goal location in precisely the same PDF file.
- Safety permissions and password security.
- Set paper size, margins, and orientation for PDF output.
- Embedded fonts.
- Unicode support.
- Right-to-left and mix/Latin text.
- Fonts, point-size, various personality designs, and colors.
- Paragraph formatting attributes like centering, justification, indentation, etc...
- Complex components like tables, nested tables, etc...
- Cascading stylesheet.
- Support for PNG, JPEG, WMF, EMF, GIF, and WMF picture formats.
- Creates PDF bookmarks for HTML Heading tags.
- Support for multithreaded software.
- The Internet Browser style supports all HTML formatting attributes supported by IE.

Code Output: The created PDF code could be written to a disc or it may be recovered in a memory buffer.

Programming Interface: Your program only uses function calls to perform the conversion. The Win32 and Win64 models contain the purpose and constant declaration documents for C/C++, Visual Basic, and Delphi. The item is usable in almost any environment that allows for phoning easy DLL functions.

The .NET edition of the item consists of pure C# managed code. The .NET variant may also be used in an ASP.NET server program.
