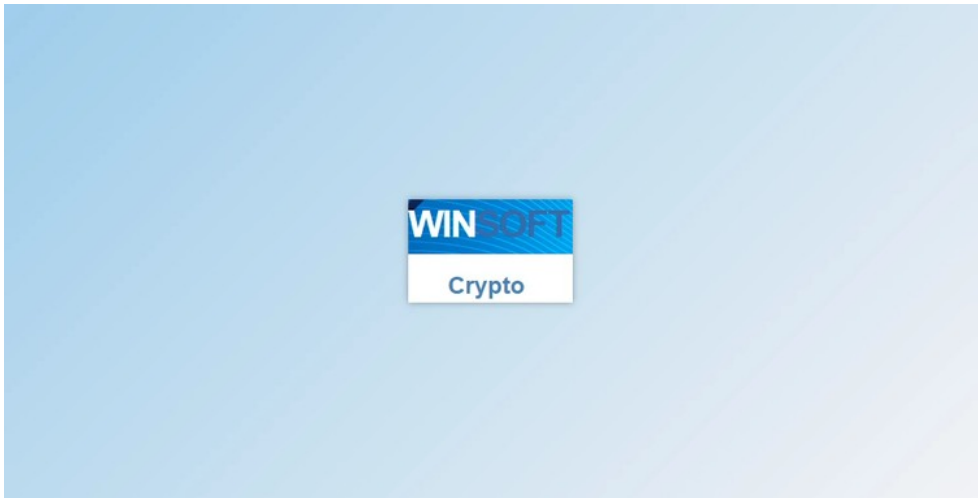
Winsoft Crypto v1.4 for Delphi & CB 7-12 Athens Full Source

2025-01-07 11:33:57



The is designed to work with the Windows Cryptography API: Next Generation (CNG), making it compatible with Delphi and C++Builder versions 7 through 12 and Lazarus 3.4. This library supports both 32-bit and 64-bit versions of Windows, allowing developers to easily create secure applications. When you register, you'll receive the source code, giving you full project control and flexibility. Plus, you can distribute your applications without worrying about any additional fees.

While the **Winsoft Crypto** library provides a robust framework for cryptographic tasks, it's important to note that it does not include specific implementations of cryptographic algorithms. This means you can integrate it into your projects as a
