Benthic Software Golden v8.4.0.842 for Win x86 & x64

2026-03-13 15:17:05

Benthic Software Golden is a powerful query tool designed specifically for Oracle databases, offering advanced functionality for querying, data editing, and import/export operations. Its close compatibility with SQLPlus conventions ensures a seamless transition for users familiar with Oracle's native querying environment. Supporting Oracle versions from 8 to 21c, Golden requires a functional Oracle Client and operates efficiently on Windows 7 and above, including Terminal Server/Citrix environments, with full Unicode support.

Benthic Software Golden's feature-rich toolkit includes client-side sorting and filtering capabilities, along with robust export options to various file formats such as CSV, XML, and HTML, and direct integration with Excel and Open Office Calc spreadsheets. Users can edit and run multiple scripts simultaneously, benefiting from SQLPlus-like features such as variable prompting, bind variables, and support for EXEC, DESC, and CONNECT statements. The tool also facilitates seamless integration with other applications through language-specific cut-and-paste functionality.

Furthermore, Golden boasts additional features such as schema information for easy script integration, colored syntax highlighting, and a sophisticated import/export application (ImpExpLite) capable of handling large datasets efficiently. With its user-friendly interface, comprehensive feature set, and seamless integration with Oracle databases, stands as a versatile solution for Oracle database querying and management needs, enhancing productivity and workflow efficiency for users across various environments.

Key Features of **Benthic Software Golden**:

所有软件资源 100%安全 已检测 无病毒 无篡改

标签

Tools Database

1. Advanced querying abilities
2. Data Editing
3. Powerful import/export abilities
4. Close compatibility with SQLPlus scripting conventions
5. Support for Oracle 8 to 21c
6. Requires a working Oracle Client
7. Full Unicode support
8. Client-side sorting and filtering
9. Export to various file formats including CSV, Delimited, XML, and HTML
10. Export to Excel and Open Office Calc through COM automation
11. Customizable Toolbars
12. Edit and run multiple scripts simultaneously
13. Support for SQLPlus variable prompting, bind variables, and external scripts with parameter passing
14. Support for EXEC, DESC, and CONNECT statements
15. Support for DBMS Output
16. Script and statement timing
17. Explain Plan output
18. Support for SQLPlus style SPOOL files
19. Editing of query results with full transaction control
20. Colored syntax highlighting
21. Schema information for pasting into scripts and queries
22. Language-specific cut and paste for pasting queries into Delphi, VB, ASP, Java, C++, PHP, etc.
23. Separate import/export application (ImpExpLite) that can handle millions of records
