

RunJS v2.9.0 (18 Apr 2023) JavaScript playground

2025-01-01 21:54:53

JavaScript is a JavaScript game for desktops.

Explore and play with JavaScript and TypeScript and TypeScript, imagine your ideas and get instant feedback whenever you write.

RunJS is a JavaScript playground that automatically analyzes your code when you type and then outputs the results to a console.

TypeScript and modern JavaScript are supported through Babel transpilation. Furthermore, Node and browser APIs are also supported.

RunJS allows you to load a node-based application derived from different JavaScript apps by connecting your workbook to the directory you want to build the application.

The Node package can be directly downloaded via this window. Available via the menu action.

RunJS is also equipped with various options that can be set up by accessing the preference tab.

Modern JavaScript playground that incorporates Node and browser APIs, as well as the ability to work with Babel and TypeScript.

RunJS is also bundled with many options set up by accessing the tab for preferences.

RunJS Great Features:

- Experimenting with JavaScript is never more straightforward. Live feedback as you type and per-line results allow you to see exactly what you're writing.
- In RunJS, you can use the browser and the Node APIs, including full access to the DOM. This lets you enjoy the flexibility not possible with a traditional REPL or the Chrome console.
- Babel, as well as TypeScript support, allows users to write contemporary syntax.
