"Underwater Lifeforms" by SFXTools is a sample library with 35 high-quality SFXs in high-quality that can make you think of alternative reality underwater characters as well as water-based atmospheres.

Each audio track has been expertly created and recorded in industry standard 24 bit/96khz to guarantee the best quality to meet today's cinematic production requirements. This library is perfect for post-production films, game audio documentaries, commercials, and any other Cinematic projects that require high-definition source recordings.
